The study of human body measurements on a comparative basis is known as anthropometrics. Its applicability to the design process is seen in the physical fit, or interface, between the human body and the various components of interior space. Human Dimension and Interior Space is the first major anthropometrically based reference book of design standards for use by all those involved with the physical planning and detailing of interiors, including interior designers, architects, furniture designers, builders, industrial designers, and students of design. The use of anthropometric data, although no substitute for good design or sound professional judgment should be viewed as one of the many tools required in the design process. This comprehensive overview of

anthropometrics consists of three parts. The first part deals with the theory and application of anthropometrics and includes a special section dealing with physically disabled and elderly people. It provides the designer with the fundamentals of anthropometrics and a basic understanding of how interior design standards are established. The second part contains easy-to-read, illustrated anthropometric tables, which provide the most current data available on human body size, organized by age and percentile groupings. Also included is data relative to the range of joint motion and body sizes of children. The third part contains hundreds of dimensioned drawings, illustrating in plan and section the proper anthropometrically based relationship between user and space. The types of spaces range from residential and commercial to recreational and institutional, and all dimensions include metric conversions. In the Epilogue, the authors challenge the interior design profession, the building industry, and the furniture manufacturer to seriously explore the problem of adjustability in design. They expose the fallacy of designing to accommodate the so-called average man, who, in fact, does not exist. Using government data, including studies prepared by Dr. Howard Stoudt, Dr. Albert Damon, and Dr. Ross McFarland, formerly of the Harvard School of Public Health, and Jean Roberts of the U.S. Public Health Service, Panero and Zelnik have devised a system of interior design reference standards, easily understood through a series of charts and situation drawings. With Human Dimension and Interior Space, these standards are now accessible to all designers of interior environments. „Mir, Ischaq dem Schreiber, wurde von meinem Meister aufgetragen, über die Reise zu berichten; von den Gefährten kam nur ich, dank der Barmherzigkeit Gottes, zurück. Ali und Rami sind nicht mehr, ich sah sie ins Feuer gehen. Und auch Jasus, der Wahrsager der Herzen, sprang in die Flammen. Was aus dem jüdischen Weisen, seiner Tochter und dem grossartigen Hauptmann wurde, weiss ich nicht. Sie wollten nicht mit mir weggehen, als ich sie dazu aufforderte. Doch eines weiss ich mit Sicherheit: Der Dämon wartet immer noch dort. Baalzebul, der Herr der Jinn.“ So beginnt der geheimnisvolle Roman und führt den Leser in die Wüste der Tuareg, zum legendären König Salomo mit seinem magischen Ring, in einen schrecklichen Sandsturm, der das Verborgene ans Licht bringt, in eine Nacht ausserhalb der Zeit, in der die Sterne stillstehen, in die Stadt der Jinn, wo mächtige Wesen der Anderswelt aus der Verzweiflung zu neuer Hoffnung finden... Die äussere Reise ist gleichzeitig eine innere, die abenteuerliche Geschichte gleichzeitig eine spirituelle, ganz in der Tradition des Sufismus, in Parabeln zu lehren.

Presents the latest safety ratings, dealer prices, fuel economy, insurance premiums, maintenance costs, and tires of new model automobiles. Includes entries for maps and atlases. längst niemanden mehr: Auch 13 Jahre nachdem der letzte Trabant, ein Viertakter Typ I.I, in Zwickau von Band gelaufen ist, zeigt sich die Position des Trabi in Liebhaberkreisen unangetastet. Der "Volkswagen der DDR" wurde zum Kultauto wie im Westen der VW Käfer oder in Frankreich die berühmte "Ente". Der Trabant ist ein Stück DDR-Alltag, er spiegelt Improvisation und Mangelwirtschaft und ab den späten 60er Jahren technische Rückständigkeit wider. Dabei fusst er auf alter Automobiltradition, war bei seiner Premiere topmodern und beeindruckte bis zum letzten Fahrzeug mit legendärer Strapazierfähigkeit. In zweiter, durchgesehener Auflage beschreibt dieses Buch Vergangenheit und Gegenwart des Trabant in all seinen Erscheinungsformen, einschließlich seiner Rolle als Fanobjekt. Die Geschichte des Trabi ist bunt schillernd, spannend, nicht ohne Tragik und rundum hoch interessant. Das Buch gibt alle Antworten zum Thema Trabant. Illustriert ist das Werk mit zahlreichen Archivfotos und zeitgenössischen Bildern - vom ersten Prototyp bis zum aufgemotzten Trabi beim Clubtreffen 2003.
