A high-rise is, in fact, any building with more than 9 storeys and not just those striking skyscrapers which shape modern city skylines. In the past architects who designed such structures used to be the exception but in the last 10 years more and more architectural offices have begun to focus on this type of building. However, the sheer complexity of designing and planning the

construction of a high-rise as opposed to other building types requires a wealth of specialized experience and expertise. The High-Rise Manual is the first comprehensive reference work on this subject. All relevant aspects of such an undertaking are examined in detail by some 24 specialist authors. Each step is extensively documented including the initial project planning, the building organisation, the laying of the foundations, the supporting structure, the building technology, the office design, and the Facility Management. Theoretical contributions present the basic principles of select Excerpt from High School Manual for Teachers This Manual has been prepared by the State High School Inspector on the authority of the State board of Education. It has been written with the cherished hope that it may be of some service to the high school teachers of the State, with whom the author has found it pleasant to labor for the upbuilding of the schools. The size of the volume forbids anything like a full discussion of the many topics mentioned in it. and precludes the discussion of many others altogether. The aim has been to make few definite suggestions on each topic, then to refer the teacher to some more exhaustive treatise. The making of long lists of reference books for either teachers or students has been carefully avoided. Lengthy bibliographies have marred the usefulness of

many an Otherwise good manual. Any teacher has it in his reach to improve himself by a close study of a few well-selected books on the matter and method of teaching. I am glad to acknowledge the help that has been given to me by many teachers throughout the State. I have quoted from some of them liberally in places, because they had already said just what I wished to sav. and had said it well.
