Cardinal Mercier's Manual of Modern Scholastic Philosophy is a standard work, prepared at the Higher Institute of Philosophy, Louvain, mainly for the use of clerical students in Catholic Seminaries. Though undoubtedly elementary, it contains a clear, simple, and methodological exposition of the principles and problems of every department of philosophy, and its appeal is not to any particular class, but broadly human and universal. Volume II contains sections on natural theology, logic, ethics and outlines of the history of philosophy. This handbook aims to be a guide to the best private schools of the country. It has been undertaken with the parent especially in mind, but it is hoped that it may be of value to school and college authorities and all others interested in the subject. It is believed that this Handbook is the first volume which attempts a critical and discriminating treatment of the private schools of the country. It is an endeavor to classify the schools on their merits -- at least a step, it is hoped, toward eventual standardization. - Editor's foreword. The rapid growth of behavior therapy over the past 20 years has been well documented. Yet the geometric expansion of the field has been so great that it deserves to be recounted. We all received our graduate training in the mid to late 1960s. Courses in behavior therapy were then a rarity. Behavioral training was based more on informal tutorials than on systematic programs of study. The behavioral

literature was so circumscribed that it could be easily mastered in a few months of study. A mere half-dozen books (by Wolpe, Lazarus, Eysenck, Ullmann, and Krasner) more-or-less comprised the behavioral library in the mid- 1960s. Seminal works by Ayllon and Azrin, Bandura, Franks, and Kanfer in 1968 and 1969 made it only slightly more difficult to survey the field. Keeping abreast of new developments was not very difficult, as Behaviour Research and Therapy and the Journal of Applied Behavior Analysis were the only regular outlets for behavioral articles until the end of the decade, when Behavior Therapy and Behavior Therapy and Experimental Psychiatry first appeared. We are too young to be maudlin, but "Oh for the good old days!" One of us did a quick survey of his bookshelves and stopped counting books with behavior or behavioral in the titles when he reached 100. There were at least half again as many behavioral books without those words in the title. Includes section "Book reviews".

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better. The motivation underlying our development of a "handbook" of creativity was different from what usually is described by editors of other such volumes. Our sense that a handbook was needed sprang not from a deluge of highly erudite studies calling out for organization, nor did it stem from a belief that the field had become so fully articulated that such a book was necessary to provide summation and reference. Instead, this handbook was conceptualized as an attempt to provide structure and organization for a field of study that, from our perspective, had come to be a large-scale example of a "degenerating" research program (see Brown, Chapter 1). The handbook grew out of a series of discussions that spanned several years. At the heart of most of our interactions was a profound unhappiness with the state of research on creativity. Our consensus was that the number of "good" works published on creativity each year was small and growing smaller. Further, we could not point to a journal, text, or professional organization that was providing leadership for the field in shaping a scientifically sound framework for the development of research programs in creativity. At the same time, we were casting about for a means of honoring a dear friend, E. Paul Torrance. Our decision was that we might best be able to honor Paul and influence research on creativity by developing a handbook designed to challenge traditional perspectives while offering research agendas based on contemporary psychological views.

Divi Zheni identifies itself as a Bulgarian women's chorus and band, but it is located in Boston and none of its members come from Bulgaria. Zlatne Uste is one of the most popular purveyors of Balkan music in America, yet the name of the band is grammatically incorrect. The members of Sviraci hail from western Massachusetts, upstate New York, and southern Vermont, but play tamburica music on traditional instruments. Curiously, thousands of Americans not only participate in traditional music and dance from the Balkans, but in fact structure their social practices around it without having any other ties to the region. In Balkan Fascination, ethnomusicologist Mirjana Lausevic, a native of the Balkans, investigates this remarkable phenomenon to explore why so many Americans actively participate in specific Balkan cultural practices to which they have no familial or ethnic connection. Going beyond traditional interpretations, she challenges the notion that participation in Balkan culture in North America is merely a specialized offshoot of the 1960s American folk music scene. Instead, her exploration of the relationship between the stark sounds and lively dances of the Balkan region

and the Americans who love them reveals that Balkan dance and music has much deeper roots in America's ideas about itself, its place in the world, and the place of the world's cultures in the American melting pot. Examining sources that span more than a century and come from both sides of the Atlantic, Lausevic shows that an affinity group's debt to historical movements and ideas, though largely unknown to its members, is vital in understanding how and why people make particular music and dance choices that substantially change their lives.
