The Concept of the Employer Feb 27 2020 Employment law has increasingly struggled to adapt to complex modern work arrangements, from agency work to corporate groups. This book suggests that the reason for this failure can be found in our concept of the employer, which has become riddled with internal contradictions in its search for a unitary employer, the counterparty to a bilateral contract, through a series of multi-functional tests focussed on the exercise of a range of employer functions. As a result of this tension, full employment law coverage is restricted to a narrow scenario where a single legal entity exercises all employer functions - a paradigm far from the reality of modern labour markets characterized by a fragmentation of work, from the rise of employment agencies and service companies to corporate groups and Private Equity investors. These problems can only be addressed by a careful reconceptualization and the development of a functional concept of the employer. The book draws on existing models in English, German, and European law to develop a definition of the employer as the entity, or combination of entities, exercising functions regulated in a particular domain of employment law. Each of the two strands of the current concept is addressed in turn to demonstrate how a more openly multi-functional approach can successfully overcome the rigidities of the current notion without abandoning a coherent underlying framework. It fills a crucial gap in employment law and corporate law with its analysis of the defects in our current understanding of the employer, and in developing a new functional concept designed to overcome the problems identified.

Constitutional Law for Criminal Justice Nov 05 2020 Criminal justice professionals often do not receive the training they need to recognize constitutional principles that apply to their everyday work. Constitutional Law for Criminal Justice offers a way to solve this problem by providing a comprehensive, well-organized, and up-to-date analysis of constitutional issues that affect criminal

justice professionals. Constitutional Law for Criminal Justice makes complex concepts accessible to students at all levels of criminal justice education. The chapters begin with an outline and end with a summary. Key terms and concepts are defined in the glossary. Tables, figures, and charts are used to synthesize and simplify information. The result is an incomparably clear, student-friendly textbook that has remained a leader in criminal justice education for 50 years.

Law and Order in Virtual Worlds: Exploring Avatars, Their Ownership and Rights

Aug 27 2022 "This book examines the legal realities which are emerging from Massively Multiplayer Online Role-playing Games (MMORPGs) or virtual worlds that demonstrate many of the traits we associate with the Earth world: interpersonal relationships, economic transactions, and organic political institutions"--Provided by publisher.

Artificial Intelligence in HCI Apr 10 2021 This book constitutes the refereed proceedings of the Second International Conference on Artificial Intelligence in HCI, AI-HCI 2021, which was held as part of HCI International 2021 and took place virtually during July 24-29, 2021. The total of 1276 papers and 241 posters included in the 39 HCII 2021 proceedings volumes was carefully reviewed and selected from 5222 submissions. The papers included in this volume were organized in topical sections as follows: Ethics, trust and explainability; human-centered AI; AI applications in HCI; and AI applications in smart environments.

State Religious Education and the State of Religious Life

Aug 22 2019 This book explores recent calls to increase instruction of the Bible in American public schools. The work develops a distinctive philosophical and trans-Atlantic assessment of these proposals by critiquing European approaches to religious education and by reviewing the role of religion in contemporary democracies. The work will spark debate among political scientists, policy experts, Religious Education instructors, theologians, and social and educational theorists.

Clinician's Guide to Treating Companion Animal Issues Mar 22 2022 Clinician's Guide to Treating Animal Companion Issues: Addressing Human-Animal Interaction is the first of its kind—a groundbreaking resource for mental health professionals who want the knowledge, skills and awareness to successfully work with pet-owning clients. The book trains clinicians across multiple disciplines to feel more comfortable and confident addressing companion-related issues—both when those issues are the primary reason for seeking therapy or a critical component in better understanding client needs. The book uses current human-animal interactions theories as a foundation to explore pet-related issues utilizing behavioral, cognitive behavioral, family systems, humanistic and contemporary psychodynamic therapeutic orientations. Users will find sections on the many issues that arise during the lifespan of pet owners (e.g., children, young adults, elderly), as well as issues pertinent to specific populations (e.g., men, homeless, ethnically diverse). Additional topics include the violence link, pet death and bereavement, and behavioral issues. As the first book to approach human-animal interactions (HAI) from a multi-theoretical perspective, it helps clinicians appropriately acknowledge and incorporate relevant HAI issues within therapy to achieve goals. Provides practical information for immediate use in practice Focuses on common issues relating to companion animals Addresses bereavement, attachment, behavior, and more Includes interactive readings, case studies and therapeutic exercises Contains multiple theoretical orientations (behavioral, cognitive behavioral, family systems, humanistic and psychodynamic approaches)

Constitutional Law Jan 20 2022 Presents an up-to-date analysis of critical constitutional issues. Special attention is given to issues of greatest concern to criminal justice personnel - detention, arrest, search and seizure, interrogations and confessions, self-incrimination, due process, and right to counsel. Also includes constitutional aspects of criminal and civil liabilities of justice

personnel, and constitutional and civil rights in the workplace. Part II presents key cases to assist in interpreting the constitutional provisions. Each chapter includes chapter outline, key terms and concepts, as well as numerous boxes defining terms and elaborating on the text. Part II contains briefs of judicial decisions related to the topics covered in the text, in order to help the reader learn rule of law as well as the reasoning of the court that guides future court rulings. Part III contains the Constitution of the United States of America, a Glossary and a Table of Cases.

Public Access ICT Across Cultures Oct 29 2022 A systematic assessment of the impact of public access to computers and the Internet, with findings from developing countries in South America, Asia, and Africa. Shared public access to computers and the Internet in developing countries is often hailed as an effective, low-cost way to share the benefits of digital technology. Yet research on the economic and social effects of public access to computers is lacking. This volume offers the first systematic assessment of the impact of shared public access in the developing world, with findings from ten countries in South America, Asia, and Africa. It provides evidence that the benefits of diversified participation in digital society go beyond providing access to technology. Public access venues—most often Internet cafés in cities and state-run telecenters in rural areas—are places for learning, sharing, working, empowerment and finding opportunities. The book documents the impact of public access on individuals, on society and networks, and on women. Chapters report findings and examine policy implications of research on such topics as users' perceptions of the benefits of Internet café use in Jordan; ICT job training in Rwanda; understanding user motivations and risk factors for overuse and Internet addiction in China; the effect of technology use on social inclusion among low-income urban youth in Argentina; productive uses of technologies by grassroots organizations in Peru; use of technology by migrant

ethnic minority Burmese women in Thailand to maintain ties with their culture and their family and friends; and women's limited access to the most ubiquitous type of venue, cybercafés, in practically all countries studied—and quite severely in some places, e.g. Uttar Pradesh, India. Contributing Editors Erwin A. Alampay, Roxana Barrantes Cáceres, Hernan Galperin, Abiodun Jagun, George Sciadas, Ramata Molo Thioune, Kentaro Toyama

Automotive Management Sep 15 2021 Das Automobilgeschäft stellt in vielen Ländern einen bedeutenden Wachstumsmotor für die Wirtschaft dar. Um im globalen Wettbewerb zu bestehen, müssen die Unternehmen der Automobilindustrie ihre strategische Ausrichtung und ihr Marketing optimieren. Dazu bietet dieses Buch eine auf die Branche abgestimmte Übersicht zu allen wichtigen Aspekten für ein erfolgreiches Automotive Management. Erfolgsfaktoren und Lösungsansätze werden von Experten aus Wissenschaft, Beratung und Unternehmen der Automobilwirtschaft umfassend und ausführlich beschrieben und mit zahlreichen Beispielen aus der Praxis illustriert.

Contemporary Oligarchies in Developed Democracies Sep 23

2019 The book analyzes concentrations of wealth and power in developed democracies. It shows that economic measures, which states adopted during the 1980s and 1990s, had evolved first into liberal oligarchy, and later, after the 2007-2008 global financial crisis, into illiberal and populist oligarchy. The shape and content of these two kinds of oligarchy have been determined largely because of practices and political strategies that powerful state and market actors employed. This project will appeal to a wide audience including academics, researchers, students, and anyone who is interested in oligarchy political power, IR, political economy, and sociology.

Empowering Electricity Jun 24 2022 Since the 1990s, there has been an upsurge in renewable electricity co-operatives across Canada as hundreds of community organizations have turned to the sun, wind, and rivers as sources of local power generation. *Empowering Electricity* offers an illuminating analysis of these co-operatives within the context of larger debates over climate change, renewable electricity policy, sustainable community development, and provincial power-sector ownership. It looks at the conditions that led to this new wave of co-operative development, examines their form and location, and shines a light on the promises and challenges accompanying their development.

What Then Must We Do? Dec 19 2021 Looks at the problems with America's current economic system offers a revolutionary way forward that the author claims is not corporate capitalism or state socialism, but rather a system that is uniquely American.

Who's who in the Capital Region Apr 30 2020

Sports Law Sep 27 2022 *Sports Law* looks at major court cases, statutes, and regulations that explore a variety of legal issues in the sports industry. The early chapters provide an overview of sports law in general terms and explore its impact on race, politics, religion, and everyday affairs. Later chapters address hot button issues such as gender equity, drug testing, and discrimination. Written from a sport management perspective,

rather than from a lawyer's, this text covers all the major areas presented in sports law today including: cases relating to torts, contracts, intellectual property, and agents. Factual scenarios throughout the text allow students to critically examine and apply sport management principles to legal issues facing the sports executive. Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition.

Managing Oak Forests in the Eastern United States Aug 03 2020

If you are responsible for oak management, *Managing Oak Forests in the Eastern United States* is for you. It is the definitive practical guide for anyone interested in improving stewardship of eastern oak forests. Organized into three sections, the first section, "Background and Biology: Setting the Stage," helps you establish a solid understanding

Russian Multinationals Oct 24 2019 Russian multinationals are playing an increasingly important role in the world economy, particularly in some key sectors such as oil, gas and metallurgy. At the same time, Russian multinationals differ in many respects from multinationals from other countries in that they often receive special treatment from the Russian government, and, because of past experiences, international investors are often reluctant to invest in them. This book presents a comprehensive overview of Russian multinationals. It discusses the rise of Russian multinationals, examines Russian multinationals' activities in key sectors, analyses the relationship between Russian multinationals and the Russian government and between Russian multinationals and international investors, and concludes by assessing how Russian multinationals are likely to develop in future.

The American Contractor May 31 2020

The Household Jul 14 2021 Some people dwell alone, many in

family-based households, and an adventuresome few in communes. *The Household* is the first book to systematically lay bare the internal dynamics of these and other home arrangements. Legal underpinnings, social considerations, and economic constraints all influence how household participants select their homemates and govern their interactions around the hearth. Robert Ellickson applies transaction cost economics, sociological theory, and legal analysis to explore issues such as the sharing of household output, the control of domestic misconduct, and the ownership of dwelling units. Drawing on a broad range of historical and statistical sources, Ellickson contrasts family-based households with the more complex arrangements in medieval English castles, Israeli kibbutzim, and contemporary cohousing communities. He shows that most individuals, when structuring their home relationships, pursue a strategy of consorting with intimates. This, he asserts, facilitates informal coordination and tends ultimately to enhance the quality of domestic interactions. He challenges utopian critics who seek to enlarge the scale of the household and legal advocates who urge household members to rely more on written contracts and lawsuits. Ellickson argues that these commentators fail to appreciate the great advantages in the home setting of informally associating with a handful of trusted intimates. *The Household* is a must-read for sociologists, economists, lawyers, and anyone interested in the fundamentals of domestic life.

Sacred Fictions of Medieval France Jan 08 2021 A study of the immensely popular "lives" of Christ and the Virgin in medieval France.

Our Canine Connection: The History, Benefits and Future of Human-Dog Interactions Apr 22 2022

Property Law and Social Morality May 12 2021 *Property Law and Social Morality* develops a theory of property that highlights the social construction of obligations that individuals owe each other.

By viewing property law through the lens of obligations rather than through the lens of rights, the author affirms the existence of important property rights (when no obligation to another exists) and defines the scope of those rights (when an obligation to another does exist). By describing the scope of the decisions that individuals are permitted to make and the requirements of other-regarding decisions, the author develops a single theory to explain the dynamics of private and common property, including exclusion, nuisance, shared decision making, and decision making over time. The development of social recognition norms adds to our understanding of property evolution, and the principle of equal freedom underlying social recognition that limit government interference with property rights.

Beyond the Synagogue Jul 02 2020 Finalist for the 2021 National Jewish Book Award in American Jewish Studies Honorable Mention, 2021 Saul Viener Book Prize, given by the American Jewish Historical Society Reveals nostalgia as a new way of maintaining Jewish continuity In 2007, the Museum at Eldridge Street opened at the site of a restored nineteenth-century synagogue originally built by some of the first Eastern European Jewish immigrants in New York City. Visitors to the museum are invited to stand along indentations on the floor where footprints of congregants past have worn down the soft pinewood. Here, many feel a palpable connection to the history surrounding them. Beyond the Synagogue argues that nostalgic activities such as visiting the Museum at Eldridge Street or eating traditional Jewish foods should be understood as American Jewish religious practices. In making the case that these practices are not just cultural, but are actually religious, Rachel B. Gross asserts that many prominent sociologists and historians have mistakenly concluded that American Judaism is in decline, and she contends that they are looking in the wrong places for Jewish religious activity. If they looked outside of traditional institutions and practices, such as attendance at synagogue or membership in

Jewish Community Centers, they would see that the embrace of nostalgia provides evidence of an alternative, under-appreciated way of being Jewish and of maintaining Jewish continuity. Tracing American Jews' involvement in a broad array of ostensibly nonreligious activities, including conducting Jewish genealogical research, visiting Jewish historic sites, purchasing books and toys that teach Jewish nostalgia to children, and seeking out traditional Jewish foods, Gross argues that these practices illuminate how many American Jews are finding and making meaning within American Judaism today.

Depression Conceptualization and Treatment Jul 26 2022

Depression, a highly common clinical disorder, is an important and clinically relevant topic for both clinical researchers and practitioners to address, because of its prevalence, impact on the individual and society, association with other mental and physical health problems and the social contexts in which it develops. Depression ranks in Germany and central Europe as the third among the leading mental disorders and world-wide is a leading cause of disability. It is estimated that 8.3 % of the German population is depressed within a year (11.2 % women, 5.5 % men). These statistics mean that 4 million people per year are depressed in Germany alone (one year prevalence). According to the WHO, over 300 million people world-wide experience depression and in the USA the financial burden of this disorder, due to disability and work absenteeism, reaches Depression is also becoming more frequent over time and has a high risk of recidivism -particularly since its most common form, Major Depressive Disorder (DSM-5; ICD10) tends to occur in episodes. For example, 20% to 40% of people become depressed again within two years after their first depressive episode, meaning that a major aim of any therapeutic intervention should be to prevent future relapses. Depression also shows very high comorbidities with other mental and physical health conditions. Its overlap with anxiety pathology is so high that clinicians are concerned with

whether the two disorder categories are indeed distinct or if they show substantial etiological overlap. Depression is also associated with heart disease and even cancer, making it a risk factor for mortality and morbidity that needs to be identified early and addressed effectively. In addition to Major Depressive Disorder, the often severe Bipolar Disorder, and the chronic form of Depression referred to as dysthymia are additional mood disorders that among them require careful differential diagnosis. They also lead to questions regarding their common or distinct etiological mechanisms. In order to gain a better understanding of Depression as a clinical disorder, one needs to look at it as a multifaceted phenomenon. Depression is a neurobehavioral condition, and one has to be up to date and have solid understanding of its biological substrate, at a genetic, neuronal, hormonal and pharmacological level. Depression is also a socio-demographic phenomenon, and one needs to examine its epidemiology, that might contain significant cues towards its clearer understanding. It is more prevalent, for example, in certain regions, climates, age groups and genders (much more prevalent in women, with age of appearance in young adulthood but also presents as a significant problem for youth and the elderly), is associated with stereotypes and stigma and can be the aftermath of crises, trauma and loss. The etiology of Depression remains under scrutiny, though recently much more knowledge is emerging from contemporary neuroimaging, genotyping and data science methods. Different neural and behavioral systems may be involved contributing to the significant heterogeneity within the disorder. Social roles, stressors, attachment patterns, family support and social networks, and individual (e.g. gender linked) vulnerabilities may contribute significantly towards increasing risk for developing depression. Different therapeutic approaches, like those stemming from the psychoanalytic/psychodynamic perspectives and those stemming from the cognitive/behavioral (2nd and 3rd wave) tradition focus on the components of etiology

considered most dominant. As science progresses with clearer evidence regarding the important etiological factors and their interactions, these different perspectives, each with its own contribution, may need to take new developments into consideration, adapt and even begin to converge. These different aspects of the topic of Depression, which are central to the scientific aims of clinical scientists, but also permeate the way clinicians approach assessment, diagnosis, case formulation and treatment, become the focus of the present volume. Following a conference held at the University of Cyprus, in Nicosia, Cyprus in October 2019, which included presentations by internationally renowned experts in the field on these various aspects of Depression, the idea of extending the topics presented and discussed at the meeting into more elaborated and substantive chapters and synthesizing them into an edited volume was generated. The aim was to fill a substantive gap, with a volume that would be beneficial to a wider, interdisciplinary audience of clinicians, trainees and researchers with examine the different aspects of Depression. In this Edited volume, with contributions from prominent experts in the field, we propose to discuss the subject of conceptualizing and treating Depression and related conditions (e.g. Suicide, Bipolar Disorder) from different theoretical perspectives and after taking into consideration current research into the etiology and maintenance of this condition. Chapters on theoretical perspectives of treatment cover a wide range of approaches, that could be broadly clustered under behavioural and psychodynamic points of view. Perspectives discussed in this volume are psychodynamic therapy, 2nd waver CBT, acceptance and commitment therapy and mentalization therapy. Special topics with great relevance to treatment, include treatment in different levels of care (e.g. partial hospital setting; prevention of suicide; working with cancer patients). The book provides a unique combination of current empirical findings on etiology of depression and suicide,

treatment considerations and practical recommendations, treatment in different settings and combination of different theoretical perspectives that can enrich a therapists' repertoire of tools for understanding and approaching depression. The book describes various theoretical approaches without adhering to anyone but with an effort to highlight common underlying themes like issues of loss, self-esteem, guilt, grief and emotion regulation as these permeate the various perspectives. In this way the book presents a combination of science and practice and of various views that constitute an excellent resource of researchers, clinicians and students of mental health professions. In a final chapter the two editors, Drs. Christos Charis and Georgia Panayiotou, make an effort to impartially integrate information from the various perspectives, highlighting the utility of each approach to address specific vulnerability and etiological factors discussed in the book. In this regard, the volume stresses the idea of the need for continuous and open dialogue between perspectives, theories, levels of investigation, research areas, practitioner needs and scientific views to help make progress in treatment and address this complex and multi-faceted phenomenon in the service of patients, their carers and societies in general.

Well-Being Over the Life Course Aug 15 2021 This book provides a multidisciplinary overview of the impact of human-animal interaction on well-being from childhood to later life. It presents a life course perspective to the study of human-animal interaction, addressing concepts of family and the role of pets therein, as well as the impact of companion animals on child development and successful aging. This book fills a gap in the existing literature by framing the study of human-animal interaction, including the role of animal-assisted interventions on well-being, in a broader social and behavioral context.

Sports Law Nov 17 2021 In *Sports Law: Governance and Regulation*, Third Edition four of the nation's leading sports law

scholars have merged their expertise to produce this problem-based sports law and governance text for undergraduate and graduate students. Drawing on the work they have done in developing the field's leading sports law casebook for law students, they present this text in the traditional law school case method style, but with an eye toward accessibility for non-law students. Whether students are interested in careers in professional or amateur sports law, this text will equip them with the foundational knowledge necessary to identify legal issues, minimize risk, and become a generation of problem solvers within the sports industry. Contracts, torts, agency, labor and employment, racial and gender equity, antitrust, and intellectual property law are all addressed, as are health and safety issues and high school, college, and international/Olympic/regulatory concerns. Moreover, the text explores the sports industry with an appreciation of its dynamism, examining topics from cutting edge issues in athlete representation to the uncertain future of big-time intercollegiate athletics. Sports Law: Governance and Regulation, Third Edition is a must for undergraduate and graduate students interested in the sports industry. New to the Third Edition: Changes to the NCAA's governance and enforcement structures, and updated bylaws and cases related to student-athlete scholarships, transfer rights, and name, image and likeness opportunities. Coverage regarding the minimizing of health and safety risks from youth through professional sport arising from concussions and the liability of various institutions for concussion-related injuries. New sections on sexual orientation discrimination, participation rights of transgender and intersex athletes, and the obligation of organizations to protect athletes from sexual misconduct. Professional sport developments regarding the appropriate breadth of commissioner authority, updated MLB, NBA, NFL, and NHL collective bargaining agreements, and an expanded discussion of professional sports leagues' personal conduct, disciplinary issues, and domestic

violence policies. Revised Olympic and international sports issues, including anti-doping, sports globalization, and athlete exploitation materials. A unique look at negotiating sport industry contracts, including coaches' and players' contracts. Professors and students will benefit from: Thorough coverage of professional and amateur sports covering contracts, torts, agency, labor, employment and health and safety law as well as regulation of high school, college and Olympic sport. Compelling explanatory text, notes, questions, and review problems to train students to identify and successfully navigate legal issues encountered in a career in sports. Well-edited cases to encourage critical thinking and discussion in the classroom. Definitions of key terms to aid in comprehension. Timely website sources that support further research and classroom discussion.

Systems Biology and Omics Approaches to Understand Complex Diseases Biology Feb 18 2022

The United States Football League, 1982-1986 Sep 03 2020 One of the most ambitious (and short-lived) endeavors in professional sports history, the United States Football League was founded in 1982. Premiering with a spring schedule and an abundance of talent that included top rookies and National Football League veterans, the USFL gained national attention with broadcast and cable television contracts, controversial player signings, ownership battles and an unsuccessful billion-dollar lawsuit against the NFL. The USFL folded after four years yet represented the last major challenge to America's big four sports leagues--the NFL, the National Basketball Association, the National Hockey League and Major League Baseball. Based upon extensive research and interviews with owners, coaches, players and administrators, this book chronicles the league's formation, its three seasons of play and its long-term effects on pro sports.

Origins of Ownership of Property Dec 31 2022 This volume investigates emerging theories in the psychological basis of ownership. Although it has been a neglected area of developmental psychology research, ownership is of broad significance in children's lives. Sharing, borrowing, buying, trading and stealing - the abstract concepts of ownership are reasoned early in childhood. Editors Ori Friedman, associate professor of psychology, University of Waterloo, and Hildy Ross, professor emeritus, University of Waterloo, argue that the study of ownership and its development provide important new directions for psychological study. Contributing authors outline the new research from perspectives drawn from the various subfields of developmental psychology. Topics include: Property in Nonhuman Primates Possession and Morality in Early Development Early Representations of Ownership Property Rights and the Resolution of Social Conflict Ownership as a Social Status Ownership and Object History Exploring Ownership in a Developmental Context This is the 132nd volume of the Jossey-Bass quarterly report series *New Directions for Child and Adolescent Development*. The mission of this series is to provide scientific and scholarly presentations on cutting edge issues and concepts in the field of child and adolescent development. Each volume focuses on a specific new direction or research topic, and is edited by an expert or experts on that topic.

A City on a Lake Mar 29 2020 In *A City on a Lake* Matthew Vitz tracks the environmental and political history of Mexico City and explains its transformation from a forested, water-rich environment into a smog-infested megacity plagued by

environmental problems and social inequality. Vitz shows how Mexico City's unequal urbanization and environmental decline stemmed from numerous scientific and social disputes over water policy, housing, forestry, and sanitary engineering. From the prerevolutionary efforts to create a hygienic city supportive of capitalist growth, through revolutionary demands for a more democratic distribution of resources, to the mid-twentieth-century emergence of a technocratic bureaucracy that served the interests of urban elites, Mexico City's environmental history helps us better understand how urban power has been exercised, reproduced, and challenged throughout Latin America.

Jews of Florida: Centuries of Stories Mar 10 2021 This first comprehensive history of the Jews of Florida from colonial times to the present is a sweeping tapestry of voices. Despite not being officially allowed to live in Florida until 1763, Jewish immigrants escaping expulsions and exclusions were among the earliest settlers. They have been integral to every facet of Florida's growth, from tilling the land and developing early communities to boosting tourism and ultimately pushing mankind into space. The Sunshine State's Jews, working for the common good, have been Olympians, Nobel Prize winners, computer pioneers, educators, politicians, leaders in business and the arts and more, while maintaining their heritage to help ensure Jewish continuity for future generations. This rich narrative - accompanied by 700 images, most rarely seen - is the result of three-plus decades of grassroots research by author Marcia Jo Zerivitz, giving readers an incomparable look at the long and crucial history of Jews in Florida.

Child and Adolescent Psychotherapy and Psychoanalysis

Nov 25 2019 Since Freud's publication of 'Little Hans', advances in psychoanalytic technique and theory have transformed our clinical work with children. Individuals including Anna Freud,

Melanie Klein and Donald Winnicott have influenced psychoanalytic play therapy and broadened the scope of practice with them. Contemporary psychoanalysts and psychoanalytic social work clinicians often find themselves responding to misapprehensions and distortions about psychoanalytic theory and treatment created or promoted in popular culture. Furthermore, clinical practices are subject to the disruptive influence of managed mental health care and, with the ascendancy of biological psychiatry, an increasing reliance on psychoactive drugs in the treatment of children, often in the absence of sound research support. In this book, expert international contributors explore developmental, theoretical and clinical themes in work with children. Focusing on diverse populations and varied treatment settings, they present compelling clinical cases and research that, collectively, demonstrate the efficacy and relevance of psychoanalytic ideas in the context of play therapy. This book was originally published as a special issue of Psychoanalytic Social Work.
