***The Washingtons. General Index, L-Z May 12 2021
Published in two parts, the General Index of all Washington descendants and their spouses completes a ten-volume history that traces the "Presidential Line" of the Washington family in America. Volume one began with the immigrant John Washington who settled in Westmoreland County, Va., in 1657, married Anne Pope, and became the great-grandfather of President George Washington. It contained the record of their descendants for a total of seven generations. Subsequent volumes two through eight continued this family history for an additional eight generations, also highlighting most notable members (volume two) and tracing lines of descent from the royalty and nobility of England and continental Europe (volume three). Volume nine treated in detail the recently discovered line of William Wright (died in Franklin County, Va., ca. 1809). It also provided briefer accounts of five other***

Southern Wright families that have often been mentioned by researchers as close kinsmen of George Washington. ADVANCE PRAISE “At long last the Washingtons have a published history worthy of their place in history. Glenn has done a masterful job. . . . I am convinced that his work will be of wide interest to historians and academics as well as members of the Washington family itself. Although the surname Washington is perhaps the best known in American history and much has been written about the Washington family for well over a century, it is surprising that no comprehensive family history has been published. Justin M. Glenn’s *The Washingtons: A Family History* finally fills this void for the branch to which General and President George Washington belonged, identifying some 63,000 descendants. This is truly a family history, not a mere tabulation of names and dates, providing biographical accounts of many of the descendants of John Washington who settled in Westmoreland County, Virginia, in 1657.” — John Frederick Dorman, editor of *The Virginia Genealogist* (1957-2006) and author of *Adventurers of Purse and Person* “Decades of reviewing Civil War books have left me surprised and delighted when someone applies exhaustive diligence to a topic not readily accessible. Dr. Glenn surely meets that standard with the meticulous research that unveils the Washington family in gratifying detail—many of

them Confederates of interest and importance.” — Robert K. Krick, author of The Smoothbore Volley that Doomed the Confederacy and Stonewall Jackson at Cedar Mountain

Education for Cataloging and the Organization of Information Oct 17 2021 What does the future hold for cataloging education? Written by some of the best-known authors and most innovative thinkers in the field, including Michael Gorman, Sheila S. Intner, and Jerry D. Saye, this comprehensive collection examines education for students and working librarians in cataloging and bibliographic control, emphasizing history, context, the state of the art at present, and suggested future directions. A liberal dose of visual aids—charts, tables, etc.—makes accessing the information quick and easy. From the editor: “The education of catalogers has swung pendulum-like from on-the-job training to graduate education and back again. The place of cataloging in the library school curriculum has swung from one of near pre-eminence to one of near extinction, and has begun to swing back again. The durability of education for cataloging has swung from ‘In getting your degree you will learn everything you need to know in your career,’ to ‘You will have to engage in continuing education throughout your career, beginning virtually as soon as you have your degree.’ Making informed decisions about how (and how much) cataloging

education is to be provided is full of pitfalls, some of which the profession has fallen into already. What is needed now is a reconsideration of how education for cataloging and bibliographic control is provided.” Education for Cataloging and the Organization of Information: Pitfalls and the Pendulum addresses four main areas: the ways professionals perceive the place, nature, and necessity of cataloging education; the professional, demographic, and academic context within which cataloging education is provided; education regarding special types of materials and special aspects of cataloging; and alternatives to traditional modes of education for cataloging, including: distance education online mentoring Web-based instruction continuing education training for (and via) cooperative projects the role of the “community of catalogers” in the continuing education of those who provide intellectual access to the world of information and much more!

Notable Americans of Czechoslovak Ancestry in Arts and Letters and in Education Jan 20 2022 As pointed out in my last two publications, no comprehensive study has been undertaken about the American Learned Men and Women with Czechoslovak roots. The aim of this work is to correct this glaring deficiency, with the focus on immigration from the period of mass migration and beyond, irrespective whether they were born in their European ancestral homes or whether they have descended from them. Whereas in the two mentioned monographs, the emphasis has been on scholars and social and natural scientists; and men and women in medicine, applied sciences and engineering, respectively, the present compendium deals with notable Americans of Czechoslovak ancestry in arts and letters, and in education. With respect to women, although most professional fields were closed to them through much of the nineteenth century, the area of arts and letters was opened to them, as noted earlier and as this

compendium authenticates.

Notable American Women with Czechoslovak Roots

Nov 17 2021 Even though there exist only a few general studies on the subject of Czechoslovak American women, this is not, at all, a reflection of the paucity of work done by these women, as this publication demonstrates. This monograph is a compendium of notable American women with Czechoslovak roots, who distinguished themselves in a particular field or area, from the time they first immigrated to America to date. Included are, not only individuals born on the territory of former Czechoslovakia, but also their descendants. This project has been approached strictly geographically, irrespective of the language or ethnicity. Because of the lack of bibliographical information, most of the monograph comprises biobibliographical information, in which area a plethora of information exists. As the reader will discover, these women have been involved, practically, in every field of human endeavor, in numbers that surprise. On the whole, they have been noted for their independent spirit and nonconforming role.
