Parenting for a Happier Home Oct 29 2022
Being a parent can be tough and there are times when you just don't have all the answers. For parents who find themselves faced with a seemingly endless spiral of conflict, poor behaviour and ineffective discipline, this is the evidence-based parenting program they've been waiting for. Divided into 12 sessions, it first focuses on developing a strong relationship between parent and child. Once a firm foundation of parenting strategies has been developed, the program then moves onto effective discipline. The discipline program is designed so that it is self-sustaining and allows the parent to step back from what is often an emotionally charged situation and instead use predetermined consequences. It also emphasises teaching children ownership of their behaviour. The beauty of this program is that the principles can be used in each of the child's environments (at home, at school, with grandparents, etc.), while it has also been designed so that

any parent can use it as well as those with children who have been diagnosed with behavioural disorders such as ADHD, Oppositional Defiance Disorder, or explosive and non-compliant behaviour. It's a commonsense, practical guide to getting your kids back on track and creating a happier home!

Teacher's Guide to Tackling Attendance Challenges Oct 17 2021 Students can succeed in school—but they must be in school to do so. Addressing absenteeism is as important as addressing problematic behavior and academic difficulties in the classroom. To address the pervasive issue of chronic absenteeism—that is, missing 10 percent of school days for any reason—educators must begin to move away from a model of reliance on reactive and punitive approaches and toward one that is preventive and positive, and that uses proven principles of behavioral change. Teacher's Guide to Tackling Attendance Challenges, by nationally known educators Jessica Sprick and Tricia Berg, provides teachers with the information and resources they need to build a strong classroom-based initiative to improve the attendance of all students, creating a classroom culture of attendance with easy-to-implement strategies. Sprick and Berg provide concrete and practical strategies for teachers to implement in their own classrooms to address chronic absence and improve the attendance of all students,

including: A framework for implementation
Sample lesson plans Examples and
reproducibles for reinforcement systems
Talking points for use with students and
families Real-world examples of successful

Unified Protocols for Transdiagnostic Treatment of Emotional Disorders in Children and Adolescents Sep 15 2021
Cognitive behavior therapy (CBT) is arguably the most effective psychotherapy model for children and adolescents with emotional disorders (e.g., anxiety, depression, obsessive-compulsive disorders, trauma and stress-related disorders, etc.). Emotional disorders in youth frequently overlap or co-occur, and

yet many of the existing, effective therapies available for children and adolescents with emotional disorders target just one or a smaller subset of these problems. The Unified Protocols for Transdiagnostic Treatment of Emotional Disorders in Children and Adolescents, based in groundbreaking research from Jill Ehrenreich-May, David H. Barlow, and colleagues, suggest that there may be a simpler and more efficient method of utilizing effective strategies, such as those commonly included in CBT, in a manner that addresses the broad array of emotional disorder symptoms in children and adolescents. The child and adolescent Unified Protocols do this by framing effective strategies in the general language of strong or intense emotions, more broadly, and by targeting change through a common lens that applies across emotional disorders. Specifically, the child and adolescent Unified Protocols help youth by allowing them to focus on a straightforward goal across emotional disorders: reducing intense negative emotion states by extinguishing the

distress and anxiety these emotions produce through emotion-focused education, awareness techniques, cognitive strategies, problem-solving and an array of behavioral strategies, including a full-range of exposure and activation techniques. The Unified Protocol for children and adolescents comprises a Therapist Guide, as well as two Workbooks, one for children, and one for adolescents.
