Operating Research Plan: Research framework Mar 10 2021

Cumulative Effects in Wildlife Management Mar 22 2022 As humans continue to encroach on wildlands, quality and quantity of wildlife habitat decreases before our eyes. A housing development here, a shopping mall there, a few more trees cut here, another road put in there, each of these diminishes available habitat. Unless the cumulative effects of multiple simultaneous development projects are recognized and incorporated at the beginning of project development, we will continue to see wildlife habitat disappear at unprecedented rates. Divided into two parts, Cumulative Effects in Wildlife Management emphasizes the importance of recognizing cumulative effects and highlights the necessity of their bearing on future policy. It begins with an outline of the differences between direct, indirect, and cumulative effects of anthropogenic impacts on wildlife habitat and addresses the similarities and differences in US and Canadian policies, legal and economic ramifications, and the confusion that stems from lack of consideration, communication, and forward planning. Section 1 also describes the current standard means of quantifying cumulative effects as proposed by the Council on Environmental Quality. Section 2 presents a series of case studies that deepen our appreciation of how anthropogenic influences interconnect and how this heightened level of understanding influences our ability to make informed decisions. Case studies include cumulative effects in the Canadian Arctic, border issues with Mexico, suburban and exurban landscapes, scenic resources, and the cumulative impacts of energy development on sage-grouse. Without a conscious knowledge of what is happening around us, we will not be able to incorporate an effective land ethic, and natural resources will be the ultimate loser. Cumulative Effects in Wildlife Management brings to light the crucial connections between human expansion and habitat destruction for those managers and practitioners charged with protecting wildlife in the face of changing landscapes.

Teen Health, Course 1 Aug 22 2019

Side Effects of Drugs Annual Feb 27 2020 Side Effects of Drugs Annual: A Worldwide Yearly Survey of New Data in Adverse Drug Reactions, Volume 40, first published in 1977, and continually published as a yearly update to the voluminous encyclopedia Meyler's Side Effects of Drugs, presents clinicians and medical investigators with a reliable and critical survey of new data and trends in the area of adverse drug reactions and interactions, with an international team of specialists contributing each year. Topics covered in this release include Central Nervous System Stimulants and Drugs that Suppress Appetite, Antidepressant drugs, Lithium, Drugs of abuse, Hypnotics and sedatives, Antipsychotic Drugs, and much more. Provides a critical yearly survey of the new data and trends regarding the side effects of drugs Authored and reviewed by worldwide pioneers in the clinical and practice sciences Presents an essential clinical on the side effects of drugs for practitioners and healthcare professionals alike

The Mere Exposure Effect, Its Relationship to Estimates of Memory and Its Role in Understanding Advertising Persuasion Sep 03 2020

The State of the World's Biodiversity for Food and Agriculture May 31 2020 The State of the World's Biodiversity for Food and Agriculture presents the first global assessment of biodiversity for food and agriculture worldwide. Biodiversity for food and agriculture is the diversity of plants, animals and micro-organisms at genetic, species and ecosystem levels, present in and around crop, livestock, forest and aquatic production systems. It is essential to the structure, functions and processes of these systems, to livelihoods and food security, and to the supply of a wide range of ecosystem services. It has been managed or influenced by farmers, livestock keepers, forest dwellers, fish farmers and fisherfolk for hundreds of generations. Prepared through a participatory, country-driven process, the report draws on information from 91 country reports to provide a description of the roles and importance of biodiversity for food and agriculture, the drivers of change affecting it and its current status and trends. It describes the state of efforts to promote the sustainable use and conservation of biodiversity for food and agriculture, including through the development of supporting policies, legal frameworks, institutions and capacities. It concludes with a discussion of needs and challenges in the future management of biodiversity for food and agriculture. The report complements other global assessments prepared under the auspices of the Commission on Genetic Resources for Food and Agriculture, which have focused on the state of genetic resources within particular sectors of food and agriculture.

The Encyclopedia of Human Resource Management, Volume 2 Apr 30 2020 Human resource management is a vital function of any organization, at the nexus of business practice, psychology, and law. This one-of-a-kind and all-in-one print and online encyclopedia offers access to information on all manner of topics and issues related to the "people" side of business. Volume 2 features hundreds of model employment forms; any item from Volume 1 that has forms associated with it will have forms provided in this volume. Forms are customizable or reproducible and compliant with current regulations. For students, researchers, and educators, the Encyclopedia will be a first stop on the way to more in-depth research. For entrepreneurs, managers, and employees, it will serve as an essential introduction and practical guide. For professionals in human resource management, it will be a handy reference.

Drugs and Violence Feb 18 2022

Exploring Developmental Psychology Jul 14 2021 This book, aimed at advanced undergraduates and postgraduate students in psychology and related areas, provides a guide to the key theories and methods used by researchers. Carefully chosen articles are accompanied by a commentary from the author that helps students to understand the rationale for a study, the choice of design and assessment measures, use of statistics, and the interpretation of results. A wide range of recent research papers is included to cover observational and experimental methods from infancy to adolescence.

Creating America Jan 26 2020

Environmental Change and Human Security: Recognizing and Acting on Hazard Impacts Dec 31 2022 Environmental and Human Security: Then and Now 1 2 ALAN D. HECHT AND P. H. LIOTTA * 1 U. S. Environmental Protection Agency Office of Research and Development 2 Pell Center for International Relations and Public Policy Salve Regina University 1. Nontraditional Threats to Security The events of September 11, 2001 have sharpened the debate over the meaning of being secure. Before 9/11 there were warnings in all parts of the world that social and environmental changes were occurring. While there was prosperity in North America and Western Europe, there was also increasing recognition that local and global effects of ecosystem degradation posed a serious threat. Trekking from Cairo to Cape Town thirty years after living in Africa as a young teacher, for example, travel writer Paul Theroux concluded that development in sub-Saharan Africa had failed to improve the quality of life for 300 million people: "Africa is materially more decrepit than it was when I first knew it—hungrier, poorer, less educated, more pessimistic, more corrupt, and you can't tell the politicians from the witch-doctors" (2002). While scholars and historians will debate the causes of 9/11 for some time, one message is clear: An often dizzying array of nontraditional threats and complex vulnerabilities define security today. We must understand them, and

deal with them, or suffer the consequences. Environmental security has always required attention to nontraditional threats linked closely with social and economic well-being.

International Law Reports Sep 15 2021 International Law Reports is the only publication in the world wholly devoted to the regular and systematic reporting in English of courts and arbitrators, as well as judgements of national courts.

Connectionist Models and Their Implications May 24 2022 This volume includes a number of articles, some of which have previously appeared in Cognitive Science. The contributions as a whole present a fair sample of the late-1980s research and practice in connectionist models.

Cognitive Development for Academic Achievement Oct 24 2019 This integrative text spotlights what educators need to know about children's cognitive development across grade levels (PreK-12) and content areas. The book provides a concise introduction to developmental neuroscience and theories of learning. Chapters on general cognitive abilities probe such crucial questions as what children are capable of remembering at different ages, what explains differences in effort and persistence, and how intelligence and aptitudes relate to learning. Domain-specific chapters focus on the development of key academic skills in reading, writing, math, science, and history. Multiple influences on academic achievement and motivation are explored, including school, family, cultural, and socioeconomic factors. Each chapter concludes with clear implications for curriculum and instruction.

MAINTENANCE ENGINEERING AND MANAGEMENT Aug 15 2021 Maintenance of equipment, machinery systems and allied infrastructure comprises the ways and means of optimizing the available resources of manpower, materials, tools and test equipment, within a set of constraints, to help achieve the targets of an organization by minimizing the downtimes. Whether the goal is to produce and sell a product at a profit or is simply to perform a mission in a cost-effective manner, the maintenance principles discussed in this text apply equally to all such types of organizations. In consonance with the growth of the industry and its modernization and the need to minimize the downtimes of machinery and equipment, the engineering education system has included maintenance engineering as a part of its curriculum. This second edition of the book continues to focus on the basics of this expanding subject, with a broad discussion of management aspects as well, for the benefit of the engineering students. It explains the concept of a maintenance system, the evaluation of its maintenance functions, maintenance planning and scheduling, the importance of motivation in maintenance, the use of computers in maintenance and the economic aspects of maintenance. This book also discusses the manpower planning and energy conservation in maintenance management. Presented in a readable style, the book brings together the numerous aspects of maintenance functions emphasizing the importance of this discipline in the engineering education. In this edition a new chapter titled, Advances in Maintenance (Chapter 21), has been included to widen the coverage of the book. Besides the students of engineering, especially those in streams of mechanical engineering and its related disciplines such as mining, industrial and production, this book will be useful to the practising engineers as well.

American Law Reports Jun 24 2022

LexisNexis Practice Guide New Jersey Trial, Post-Trial, and Appellate Proceedings, 2015 Edition Apr 10 2021 LexisNexis Practice Guide New Jersey Trial, Post-Trial, and Appellate Proceedings, 2015 Edition is a one-source solution drawing on a distinguished group of experts to cover most issues that arise during trial and post-trial proceedings - including jury charges, bench trials, opening statements, expert witnesses, and more. It also contains detailed coverage of appeals to the Appellate Division and New Jersey Supreme Court. Includes more than 140 practice tips and 50 checklists. The eBook versions of this title feature links to Lexis Advance for further legal research options.

Setting Performance Standards for Student Achievement Nov 29 2022

Visual Detection, Identification, and Localization Jun 12 2021 The literature survey was undertaken to explore information on the nature of and conditions for effective visual perception at low light levels. From the survey, 407 reports or studies were selected for inclusion in the annotated bibliography. With a few exceptions, the material falls within the areas of detection, identification, and localization. Many laboratory studies are included which could undergo appropriate modification for repetition in natural settings at low light levels. In each annotation the purpose and the results or conclusions of the study are stated; method and procedure are indicated only briefly. (Author).

Crossing Over 6 Tm' 2002 Ed. Dec 19 2021

The final report of the Joint Commission on Prescription Drug Use, inc Jul 26 2022

The Dark Side of Behaviour at Work Aug 03 2020 Corporations of every size have experience of employees who are guilty of lying, stealing, sabotage, hacking, destruction of files and data, and more than a few corporations have been, and continue to be, devastated by the activities of whistleblowers. Profits, secrets and staff morale are all threatened. This book provides a background to the psychology of deviance and offers practical advice about identifying the causes of and prescriptions for reversing disloyalty.

Connectivity Conservation Management Nov 05 2020 In an era of climate change, deforestation and massive habitat loss, we can no longer rely on parks and protected areas as isolated 'islands of wilderness' to conserve and protect vital biodiversity. Increasing connections are being considered and made between protected areas and 'connectivity' thinking has started to expand to the regional and even the continental scale to match the challenges of conserving biodiversity in the face of global environmental change. This groundbreaking book is the first guide to connectivity conservation management at local, regional and continental scales. Written by leading conservation and protected area management specialists under the auspices of the World Commission on Protected Areas of IUCN, the International Union for the Conservation of Nature, this guide brings together a decade and a half of practice and covers all aspects of connectivity planning and management. The book establishes a context for managing connectivity conservation and identifies large scale naturally interconnected areas as critical strategic and adaptive responses to climate change. The second section presents 25 rich and varied case studies from six of the eight biogeographic realms of Earth, including the Cape Floristic Region of Africa, the Maloti-Drakensberg Mountains, the Australian Alps to Atherton Corridor, and the Sacred Himalayan Landscape connectivity area (featuring Mount Everest.) The remarkable 3200 kilometre long Yellowstone to Yukon corridor of Canada and the United States of America is described in detail. The third section introduces a model for managing connectivity areas, shaped by input from IUCN workshops held in 2006 and 2008 and additional research. The final chapter identifies broad guidelines that need to be considered in undertaking connectivity conservation management prior to reinforcing the importance and urgency of this work. This handbook is a must have for all professionals in protected area management, conservation, land management and resource management from the field through senior management and policy. It is also an ideal reference for students and academics in geography, protected area management and from across the environmental and natural sciences, social sciences and landuse planning. Published with Wilburforce Foundation, WWF, ICIMOD, IUCN, WCPA, Australian Alps and The Nature Conservancy.

The Effects of Familiarity on the Perceptual Recognition and Categorization of Verbal Information Oct 29 2022 The effects of stimulus familiarity on the processing of stimulus and memorial information were investigated in two tasks: one which supposedly required only the perceptual recognition of each stimulus word (E task), and one which required a meaningful categorization of each stimulus word (C task). A comparison of the data for the two tasks and a consideration of the slopes of the RT functions obtained in the E task indicated that these functions reflected a memory process that follows recognition, rather than the recognition process itself. It was this memory process, rather than recognition, which seemed to be sensitive to familiarity. In the C task it appeared that familiarity affected both the retrieval and testing of the stored information about the meanings of the stimulus words. (Author).

Environmental Management in Organizations Sep 27 2022 Environmental issues can present some daunting operational concerns for all types of organization, whether in the private, public and voluntary sectors. Managing them requires environmental professionals with a working knowledge of the rapidly developing body of regulatory measures. This new edition of Environmental Management in Organizations provides all the management tools, performance measures and communication strategies that organizations need to manage their environmental responsibilities effectively. Leading experts on each topic provide focused explanations and clear practical guidance, as well as setting out the context and the key

environmental and management drivers. This edition significantly updates the original handbook to take account of developments in the environmental agenda, including new dedicated chapters on climate change, energy, transport, biodiversity and chemicals. Published with IEMA.

I Remember Me Sep 23 2019 This volume investigates mnemonic self-reference effects in preschoolers, referring to memory recall of stimuli as a function of the depth of mental processing. It explores a series of 7 experiments exploring the role of self in 3- and 4-year-olds' event memory. This effect is thought to be based on the organizational properties of a highly elaborated self-concept, and so offers a clear route to study the child's developing sense of self. However, very few studies have investigated the origin and the development of this effect. New evidence is provided to suggest that preschool children, like adults, show a mnemonic advantage for material that has been physically linked with the self through performance of a depicted action (Experiment 1). Moreover, 3- and 4-year olds show a bias for material that has been visually and linguistically processed with the self-image (Experiments 2, 3, 4), and material that has been socio-cognitively linked to the self in terms of ownership (Experiments 5, 6, 7). The data imply that both bottom-up (kinesthetic feedback, self-concept) and top-down (attention) aspects of self-reflection may play a supporting role in early event memory, perhaps representing a nascent form of autobiographical processing. Importantly, this research highlights a promising methodology for elucidating the executive role of the self in cognition.

The Oxford Compendium of Visual Illusions Jan 20 2022 Visual illusions are compelling phenomena that draw attention to the brain's capacity to construct our perceptual world. The Compendium is a collection of over 100 chapters on visual illusions, written by the illusion creators or by vision scientists who have investigated mechanisms underlying the phenomena. --

The Oxford Handbook of Deaf Studies in Learning and Cognition Jan 08 2021 In recent years, the intersection of cognitive psychology, developmental psychology, and neuroscience with regard to deaf individuals has received increasing attention from a variety of academic and educational audiences. Both research and pedagogy have addressed questions about whether deaf children learn in the same ways that hearing children learn, how signed languages and spoken languages might affect different aspects of cognition and cognitive development, and the ways in which hearing loss influences how the brain processes and retains information. There are now a number of preliminary answers to these questions, but there has been no single forum in which research into learning and cognition is brought together. The Oxford Handbook of Deaf Studies in Learning and Cognition aims to provide this shared forum, focusing exclusively on learning, cognition, and cognitive development from theoretical, psychological, biological, linguistic, social-emotional, and educational perspectives. Each chapter includes state-of-the-art research conducted and reviewed by international experts in the area. Drawing this research together, this volume allows for a synergy of ideas that possesses the potential to move research, theory, and practice forward.
