Environmental History of the Hudson River Technique for estimating flood-peak discharges and frequencies on rural streams in Illinois

The second edition of Consumer Culture brings this successful introductory textbook right up-to-date for students who are interested in the nature and role of consumption in modern societies. It introduces the importance of new object-based studies for consumer culture, as well as adding new chapters on branding and the rise of ethical consumption. Drawing on a wide range of studies, and using contemporary illustrations from the media and popular culture, the author examines the rise of consumer culture and the changing relations between the production and consumption of cultural goods. She argues that consumer culture has become increasingly stylized and now provides an important context for everyday creativity. The author explores the way an individual's position

in social groups structured by class, gender, race and age affects the nature of his or her participation in consumer culture. She also argues that this has contributed to changes in the way in which individuals belong to these social groups. The powerful role consumption plays in our lives is thus revealed as consumer culture is seen to provide new ways of creating social and political identities. From Darwin to David Attenborough, many naturalists built their careers on a curiosity which began in early childhood. However, in this digital age our children can all too easily become isolated from meaningful contact with both the natural world and the people around them. Foraging for wild food can help refocus them and a day gathering edible plants, picked in the wild, can be a great way to reconnect with family and nature. With clear information, instructions and illustrations, this book looks at 30 edible plants commonly found in our parks, woodlands and hedgerows. It shows you how to identify them safely and gather them to make delicious recipes that are easy to create and tempting and nutritious for young children. The plants are organized by season and there are scrumptious things to

make throughout the year including puffball kebabs, sea beet huff-a-puffs, staghorn sumac lemonade, sweet potato & chestnut burgers, and hazelnut chocolate spread. Once you've caught the foraging bug, you'll soon be looking for chestnuts to roast, hazelnuts to crack, or the best wild apple trees. Foraging is for life! course you'll learn about the wonderful variety of teas—from mint and orange pekoe to vanilla milk and iced clove cooler—and how to serve the perfect pot. The Dictionary of Louisiana French (DLF) provides the richest inventory of French vocabulary in Louisiana and reflects precisely the speech of the period from 1930 to the present. This dictionary describes the current usage of French-speaking peoples in the five broad regions of South Louisiana: the coastal marshes, the banks of the Mississippi River, the central area, the north, and the western prairie. Data were collected during interviews from at least five persons in each of twenty-four areas in these regions. In addition to the data collected from fieldwork, the dictionary contains material compiled from existing lexical inventories, from texts published after 1930, and from archival recordings. The new authoritative resource, the DLF not only contains the largest number of words and expressions but also provides the most complete information

available for each entry. Entries include the word in the conventional French spelling, the pronunciation (including attested variants), the part of speech classification, the English equivalent, and the word's use in common phrases. The DLF features a wealth of illustrative examples derived from fieldwork and textual sources and identification of the parish where the entry was collected or the source from which it was compiled.
