*Manual of First and Second Fixing Carpentry* Oct 17 2021 Les Goring's book covers all the detailed knowledge required for carrying out first fixing carpentry - such as modern and traditional roofing and fitting and fixing modern and traditional floor joists on new-build sites before plastering or drylining of walls and ceilings takes place - and second fixing carpentry - such as fitting staircases, hanging doors, skirting and architraves and kitchen units after dry-lined plastering has taken place and the shell of the building is watertight. In the opening chapters, this work also covers reading-of-drawings' knowledge, tools and fixing-devices. This new edition, with over 500 coloured drawings supporting its step-by-step approach, has been updated throughout to take into account current industry practices and changes in the UK's Building Regulations. Two new chapters have also been added, covering the formwork carpentry for casting in situ, reinforced concrete stairs and landings, and making and fixing different shelf arrangements to correct spans. The breadth of coverage and clear 'how-to-do-it' text makes this book an essential in-and-after-college resource for the 2000 apprentices per year taking NVQs and the 1500 students following Construction Awards within the Wood Occupations from the City & Guilds' Construction Skills. The in-depth technical detail and practical focus makes this book an essential purchase for all aspiring woodworkers, craft teachers and construction lecturers - to either read now and/or use as a future reference manual. It should also be of value to general builders and DIY enthusiasts, whose carpentry knowledge might (understandably) be sketchy in certain areas.

*The Hands-on XBEE Lab Manual* May 24 2022 Get the practical knowledge you need to set up and deploy XBee modules with this hands-on, step-by-step series of experiments. The Hands-on XBee Lab Manual takes the reader through a range of experiments, using a hands-on approach. Each section demonstrates module set up and configuration, explores module functions and capabilities, and, where applicable, introduces the necessary microcontrollers and software to control and communicate with the modules. Experiments cover simple setup of modules, establishing a network of modules, identifying modules in the network, and some sensor-interface designs. This book explains, in practical terms, the basic capabilities and potential uses of XBee modules, and gives engineers the know-how that they need to apply the technology to their networks and embedded systems. Jon Titus (KZ1G) is a Freelance technical writer, editor, and designer based in Herriman, Utah, USA and previously editorial director at Test & Measurement World magazine and EDN magazine. Titus is the inventor of the first personal-computer kit, the Mark-8, now in the collection at the Smithsonian Institution. The only book to cover XBee in practical fashion; enables you to get up and running quickly with step-by-step tutorials Provides insight into the product data sheets, saving you time and helping you get straight to the information you need Includes troubleshooting and testing information, plus downloadable configuration files and fully-documented source code to illustrate and explain operations
