Making Magic Oct 29 2022 Randall Styers seeks to account for the vitality of scholarly discourse purporting to define and explain magic despite its failure to do just that. He argues that it can best be explained in light of the European and Euro-American drive to establish and secure their own identity as normative.

Spiritual Merchants Jan 20 2022 They can be found along the side streets of many American cities: herb or candle shops catering to practitioners of Voodoo, hoodoo, Santería, and similar beliefs. Here one can purchase ritual items and raw materials for the fabrication of traditional charms, plus a variety of soaps, powders, and aromatic goods known in the trade as "spiritual products." For those seeking health or success, love or protection, these potions offer the power of the saints and the authority of the African gods. In *Spiritual Merchants*, Carolyn Morrow Long provides an inside look at the followers of African-based belief systems and the retailers and manufacturers who supply them. Traveling from New Orleans to New York, from Charleston to Los Angeles, she takes readers on a tour of these shops, examines the origins of the products, and profiles the merchants who sell them. Long describes the principles by which charms are thought to operate, how ingredients are chosen, and the uses to which they are put. She then explores the commodification of traditional charms and the evolution of the spiritual products industry--from small-scale mail order "doctors" and hoodoo drugstores to major manufacturers who market their products worldwide. She also offers an eye-opening look at how merchants who are not members of the culture entered the business through the manufacture of other goods such as toiletries, incense, and

pharmaceuticals. Her narrative includes previously unpublished information on legendary Voodoo queens and hoodoo workers, as well as a case study of John the Conqueror root and its metamorphosis from spirit-embodiment charm to commercial spiritual product. No other book deals in such detail with both the history and current practices of African-based belief systems in the United States and the evolution of the spiritual products industry. For students of folklore or anyone intrigued by the world of charms and candle shops, *Spiritual Merchants* examines the confluence of African and European religion in the Americas and provides a colorful introduction to a vibrant aspect of contemporary culture. The Author: Carolyn Morrow Long is a preservation specialist and conservator at the the Smithsonian Institution's National Museum of American History.

Magic and Religion Feb 06 2021 This essential text on the psychology of religion studies the fundamental origins of human spirituality. In *Magic and Religion*, psychologist George B. Vetter approaches magico-religious behavior as a universal human phenomenon. He examines the various wide-ranging theories regarding the psychology of religion before calling for a more scientifically rigorous approach to the subject. Putting forth his own provocative and enlightening thesis, Vetter argues that magic and religion are predictable behavior patterns developed in situations that are uncontrollable, yet of momentous importance to the individual or collective. First published in 1958, *Magic and Religion* was a significant contribution to the psychology and sociology of religion. Hailed by some as an essential text on the subject, it was denounced by others as heresy, in part because of its frank criticism of clerical celibacy and its early advocacy for abortion rights.

Magic and Religion Mar 10 2021 'The sin of witchcraft is as the sin of rebellion.' The idea which inspires this text probably is that a person who seeks to obtain his ends by witchcraft is rebelling against the deity or deities through whom alone these ends should be sought. Witchcraft is also an insult and injury to the

official priests, who regard the witch as the surgeon regards the bone-setter, or as the geologist regards the 'dowser' or water-finder who uses the divining-rod. Magic or witchcraft falls into two main classes. The former is magic of the sort used by people who think that things accidentally like each other influence each other. You find a stone shaped like a yam, and you sow it in the yam plot. You find a stone like a duck, and expect to have good duck-shooting while you carry the stone about in a bag. In the same way the part influences the whole; you burn some of a man's hair, and so he catches a fever. Imitation works in the same manner; you imitate the emergence of grubs from the larvæ, and you expect grubs to emerge. All magic of this kind is wrought by material objects, sticks, stones, hair, and so forth, which sometimes have been 'charmed' by songs chanted over them. Among the Arunta of Central Australia, in many respects a backward people, we do hear of an 'evil spirit' influencing the material object which has been charmed.[1] We also hear of spirits which instruct men in medical magic. But, as a rule, the magic is materialistic. It really does produce effects, by suggestion: a man dies and a woman is won, if they know that magic is being worked to kill or woo. The second sort of magic acts by spells which constrain spirits or gods to do the will of the magician. This magic involves itself in religion when the magical ceremonies are, so to speak, only symbolic prayers expressed in a kind of sign-language. But if the idea is to put constraint by spells on a god or spirit, then the intention is magical and rebellious. Though the official priest of a savage god may use magic in his appeal to that deity, he is not a wizard. It is the unofficial practitioner who is a witch, just as the unqualified medical practitioner is a quack.

The Sacred and the Sinister Apr 30 2020 Inspired by the work of eminent scholar Richard Kieckhefer, *The Sacred and the Sinister* explores the ambiguities that made (and make) medieval religion and magic so difficult to differentiate. The essays in this collection investigate how the holy and unholy were distinguished in

medieval Europe, where their characteristics diverged, and the implications of that deviation. In the Middle Ages, the natural world was understood as divinely created and infused with mysterious power. This world was accessible to human knowledge and susceptible to human manipulation through three modes of engagement: religion, magic, and science. How these ways of understanding developed in light of modern notions of rationality is an important element of ongoing scholarly conversation. As Kieckhefer has emphasized, ambiguity and ambivalence characterize medieval understandings of the divine and demonic powers at work in the world. The ten chapters in this volume focus on four main aspects of this assertion: the cult of the saints, contested devotional relationships and practices, unsettled judgments between magic and religion, and inconclusive distinctions between magic and science. Freshly insightful, this study of ambiguity between magic and religion will be of special interest to scholars in the fields of medieval studies, religious studies, European history, and the history of science. In addition to the editor, the contributors to this volume are Michael D. Bailey, Kristi Woodward Bain, Maeve B. Callan, Elizabeth Casteen, Claire Fanger, Sean L. Field, Anne M. Koenig, Katelyn Mesler, and Sophie Page.

Magika Hiera May 12 2021 This collection challenges the tendency among scholars of ancient Greece to see magical and religious ritual as mutually exclusive and to ignore "magical" practices in Greek religion. The contributors survey specific bodies of archaeological, epigraphical, and papyrological evidence for magical practices in the Greek world, and, in each case, determine whether the traditional dichotomy between magic and religion helps in any way to conceptualize the objective features of the evidence examined. Contributors include Christopher A. Faraone, J.H.M. Strubbe, H.S. Versnel, Roy Kotansky, John Scarborough, Samuel Eitrem, Fritz Graf, John J. Winkler, Hans Dieter Betz, and C.R. Phillips.

Magika and Religion in Medieval England May 24 2022 During

the Middle Ages, many occult rituals and beliefs existed and were practiced alongside those officially sanctioned by the church. While educated clergy condemned some of these as magic, many of these practices involved religious language, rituals, or objects. For instance, charms recited to cure illnesses invoked God and the saints, and love spells used consecrated substances such as the Eucharist. *Magic and Religion in Medieval England* explores the entanglement of magical practices and the clergy during the Middle Ages, uncovering how churchmen decided which of these practices to deem acceptable and examining the ways they persuaded others to adopt their views. Covering the period from 1215 to the Reformation, Catherine Rider traces the change in the church's attitude to vernacular forms of magic. She shows how this period brought the clergy more closely into contact with unofficial religious practices than ever before, and how this proximity prompted them to draw up precise guidelines on distinguishing magic from legitimate religion. Revealing the necessity of improving clerical education and the pastoral care of the laity, *Magic and Religion in Medieval England* provides a fascinating picture of religious life during this period.

Making Magic: Religion, Magic, and Science in the Modern World Jul 26 2022 Since the emergence of religious studies and the social sciences as academic disciplines, the concept of "magic" has played a major role in defining religion and in mediating the relation of religion to science. Across these disciplines, magic has regularly been configured as a definitively non-modern phenomenon, juxtaposed to distinctly modern models of religion and science. Yet this notion of magic has remained stubbornly amorphous. In *Making Magic*, Randall Styers seeks to account for the extraordinary vitality of scholarly discourse purporting to define and explain magic despite its failure to do just that. He argues that this persistence can best be explained in light of the Western drive to establish and secure distinctive norms for modern identity, norms based on narrow forms of instrumental rationality, industrious labor, rigidly defined sexual roles, and the containment of wayward forms of desire. Magic has served to designate a form of alterity or deviance against which dominant Western notions of appropriate religious piety, legitimate scientific rationality, and orderly social relations are brought into relief. Scholars have found magic an invaluable tool in their efforts to define the appropriate boundaries of religion and science. On a broader level, says Styers, magical thinking has served as an

important foil for modernity itself. Debates over the nature of magic have offered a particularly rich site at which scholars have worked to define and to contest the nature of modernity and norms for life in the modern world.

Medicine, Magic and Religion Mar 22 2022 One of the most fascinating men of his generation, W.H.R. Rivers was a British doctor and psychiatrist as well as a leading ethnologist. Immortalized as the hero of Pat Barker's award-winning *Regeneration* trilogy, Rivers was the clinician who, in the First World War, cared for the poet Siegfried Sassoon and other infantry officers injured on the western front. His researches into the borders of psychiatry, medicine and religion made him a prominent member of the British intelligentsia of the time, a friend of H.G. Wells, George Bernard Shaw and Bertrand Russell. Part of his appeal lay in an extraordinary intellect, mixed with a very real interest in his fellow man. *Medicine, Magic and Religion* is a prime example of this. A social institution, it is one of Rivers' finest works. In it, Rivers introduced the then revolutionary idea that indigenous practices are indeed rational, when viewed in terms of religious beliefs.

Magic and Magicians in the Middle Ages and the Early Modern Time Sep 03 2020 There are no clear demarcation lines

between magic, astrology, necromancy, medicine, and even sciences in the pre-modern world. Under the umbrella term 'magic,' the contributors to this volume examine a wide range of texts, both literary and religious, both medical and philosophical, in which the topic is discussed from many different perspectives. The fundamental concerns address issue such as how people perceived magic, whether they accepted it and utilized it for their own purposes, and what impact magic might have had on the mental structures of that time. While some papers examine the specific appearance of magicians in literary texts, others analyze the practical application of magic in medical contexts. In addition, this volume includes studies that deal with the rise of the witch craze in the late fifteenth century and then also investigate whether the Weberian notion of disenchantment pertaining to the modern world can be maintained. Magic is, oddly but significantly, still around us and exerts its influence. Focusing on magic in the medieval world thus helps us to shed light on human culture at large.

Religion, Magic, and the Origins of Science in Early Modern England Sep 15 2021 In these articles John Henry argues on the one hand for the intimate relationship between religion and early modern attempts to develop new understandings of nature, and on the other hand for the role of occult concepts in early modern natural philosophy. Focussing on the scene in England, the articles provide detailed examinations of the religious motivations behind Roman Catholic efforts to develop a new mechanical philosophy, theories of the soul and immaterial spirits, and theories of active matter. There are also important studies of animism in the beginnings of experimentalism, the role of occult qualities in the mechanical philosophy, and a new account of the decline of magic. As well as general surveys, the collection includes in depth studies of William Gilbert, Sir Kenelm Digby, Henry More, Francis Glisson, Robert Boyle, Robert Hooke, and Isaac Newton.

The Golden Bough Aug 15 2021 Sir James George Frazer's *The Golden Bough: A Study in Magic and Religion* is a broad comparative study of mythology and religion. Treating religion as a cultural phenomenon rather than discussing it from a theological perspective, the effect of *The Golden Bough* on both European literature and the emerging discipline of anthropology was substantial. The pioneering anthropologist Bronislaw Malinowski said of it: "No sooner had I read this great work than I became immersed in it and enslaved by it. I realized then that anthropology, as presented by Sir James Frazer, is a great science, worthy of as much devotion as any of her elder and more exact studies and I became bound to the service of Frazerian anthropology."

Magic and Ritual in the Ancient World Nov 25 2019 This volume contains a series of provocative essays that explore expressions of magic and ritual power in the ancient world. The strength of the present volume lies in the breadth of scholarly approaches represented. The book begins with several papyrological studies presenting important new texts in Greek and Coptic, continuing with essays focussing on taxonomy and definition. The concluding essays apply contemporary theories to analyses of specific test cases in a broad variety of ancient Mediterranean cultures. Paul Mirecki, Th.D. (1986) in Religious Studies, Harvard Divinity School, is Associate Professor of Religious Studies at the University of Kansas. Marvin Meyer, Ph.D. (1979) in Religion, Claremont Graduate School, is Professor of Religion at Chapman University, Orange, California, and Director of the Coptic Magical Texts Project of the Institute for Antiquity and Christianity.

Between Magic and Religion Aug 27 2022 *Between Magic and Religion* represents a radical rethinking of traditional distinctions involving the term 'religion' in the ancient Greek world and beyond, through late antiquity to the seventeenth century. The title indicates the fluidity of such concepts as religion and magic, highlighting the wide variety of meanings evoked by these shifting terms from ancient to modern times. The contributors put these

meanings to the text, applying a wide range of methods in exploring the many varieties of available historical, archaeological, iconographical, and literary evidence. No reader will ever think of magic and religion the same way after reading through the findings presented in this book. Both terms emerge in a new light, with broader applications and deeper meanings.

Magic, Science and Religion Oct 17 2021 2015 Reprint of 1954 Edition. Full facsimile of the original edition. Not reproduced with Optical Recognition Software. In his handling of science, magic, and religion, Malinowski essentially accepted the traditional Western conception of a dual reality-the reality of the natural world, grounded in observation and rational procedures that lead to mastery, and supernatural reality, grounded in emotional needs that give rise to faith. Unlike Frazer, for example, Malinowski derived science not from magic but from man's capacity to organize knowledge, as demonstrated by Trobriand technical skills in gardening, shipbuilding, etc. In contrast, he treated magic, which coexisted with these skills, as an organized response to a sense of limitation and impotence in the face of danger, difficulty, and frustration. Again, he differentiated between magic and religion in defining magical systems as essentially pragmatic in their aims and religious systems as self-fulfilling rituals organized, for example, around life crises.

Religion and Magic in Ancient Egypt Jun 24 2022 The ancient Egyptians believed that the Nile - their life source - was a divine gift. Religion and magic permeated their civilization, and this book provides a unique insight into their religious beliefs and practices, from 5000 BC to the 4th century AD, when Egyptian Christianity replaced the earlier customs. Arranged chronologically, this book provides a fascinating introduction to the world of half-human/half-animal gods and goddesses; death rituals, the afterlife and mummification; the cult of sacred animals, pyramids, magic and medicine. An appendix contains translations of Ancient Egyptian spells.

Black Magic Apr 10 2021 "Chireau has written a marvelous text on an important dimension of African American religious culture. Expanding beyond the usual focus of scholarship on Christianity, she describes and analyzes the world of magical-medical-religious practice, challenging hallowed distinctions among "religion" and "magic." Anyone interested in African American religion will need to reckon seriously with Chireau's text on conjure."—Albert J. Raboteau, Princeton University "Deprived of their own traditions and defined as chattel, enslaved Africans formed a new orientation in America. Conjuring—operating alongside of and within both the remnants of African culture and the acquired traditions of North America—served as a theoretical and practical mode of deciphering and divining within this, enabling them to create an alternate meaning of life in the New

World. Chireau's is the first full-scale treatment of this important dimension of African American culture and religion. A wonderful book!"—Charles H. A Mirror of Rabbinic Hermeneutics Aug 22 2019 Rabbinic hermeneutics in ancient Judaism reflects this multifaceted world of the text and of reality, seen as a world of reference worth commentary. As a mirror, it includes this world but perhaps also falsifies reality, adapting it to one's own aims and necessities. It consists of four parts: Part I, considered as introduction, is the description of the "Rabbinic Workshop" (*Officina Rabbinica*), the rabbinic world where the student plays a role and a reformation of a reformation always takes place, the world where the mirror was created and manufactured. Part II deals with the historical environment, the world of reference of rabbinic Judaism in Palestine and in the Hellenistic Diaspora (Reflecting Roman Religion); Part III focuses on magic and the sciences, as ancient (political and empirical) activities of influence in the double meaning of receiving and adopting something and of attempt to produce an effect on persons and objects (*Performing the Craft of Sciences and Magic*). Part IV addresses the rabbinic concern with texts (Reflecting on Languages and Texts) as the main area of "influence" of the rabbinic academy in a space between the texts of the past and the real world of the present.
