The first broad retrospective of August Kleinzahler's career, *Sleeping It Off in Rapid City* gathers poems from his major works along with a rich portion of new poems that visit different voice registers, experiment with form and length, and confirm Kleinzahler as among the most inventive and brilliant poets of our time. Travel—actual and imaginary—remains a passion and inspiration, and in these pages the poet also finds "This sanctified ground / Here, yes, here / The dead solid center of the universe / At the heart of the heart of America." This book evaluates off-grid solar electrification in Africa by examining how political, economic, institutional, and social forces shape the adoption of off-grid solar technologies, including how issues of energy injustice are manifested at different levels and spaces. The book takes a historical, contemporary, and projective outlook using case studies from pre- and ongoing electrification communities in non-Western countries such as Ghana, Kenya, Rwanda, Senegal, Malawi, Tanzania, and Nigeria. Beyond the diverse nature of these countries in terms of their geographical location in West, East, and Southern Africa, each offers a different experience in terms of colonial history, economic and institutional infrastructure, social and cultural context, and level of adoption of off-grid solar technologies. Notably, the book contributes to the off-grid solar and energy justice scholarship in low-income non-Western contexts. It examines various approaches to energy justice and does so by engaging with Western and non-Western philosophical notions of the concept. It takes into consideration the major principles of Ubuntu philosophy with the adoption of off-grid solar technologies, hence enriching the energy justice framework. Finally, the book interrogates the degree to which the social mission that catalysed the expansion of the off-grid solar sector is being undermined by broader structural dynamics of the capital investment upon which it is reliant. It also argues that the ascendance of off-grid solar electrification in Africa is transformative in that it enables millions of people without access to or facing uncertainties linked to centralised grid energy to have access to basic energy services. Paul Gerhard Prestegaard was a die-hard, square-jawed Norwegian, with all the

principles and authoritativeness that description summons. He was also a fun-loving family man who lived to tell stories, none more so than his own set forth here. Included in his pithy commentaries are a brush with Lindbergh before the famous Paris flight, building several businesses from scratch, the path to secure several patents and overall living a large life. Included also are investment recommendations honed from hard experience, remembrances by family and friends, and a historic family timeline. This book is concerned with an investigation of severe school attendance problems. The purpose of this study is to integrate and synthesize related research carried out over the last ten years on this important social problem. The research describes the first use of randomly controlled trials by the courts in Great Britain and the psychiatric assessment of a non-clinical population of poor attenders. The approach provides new and interesting data and a good methodological example of the use of randomized experiments by the courts. This book covers everything from small vessels commonly used by civilian sailors to the most advanced types of boats and equipment on the market. 1991. His ability scrupulously to evoke the landscapes and the peoples of the Highlands, his blending together of myth and reality and his wide-ranging imagination make Neil Gunn the most important Scottish novelist of the 20th century. --Trevor Royle, *The Macmillan Companion to Scottish Literature*

Within the joint German-Russian research project Siberian River Run-off (SIRRO) multidisciplinary studies were carried out in the Ob and Yenisei estuaries and adjacent southern Kara Sea (Arctic Ocean). The overall goal of the project was to extend knowledge on understanding the freshwater and sediment input by the major Siberian rivers and its impact on the environments of the inner Kara Sea. The main results of oceanographical, biological, geochemical, geological and modelling studies are presented in four main chapters: (A) Modern Discharge: Data and modelling; (B) Discharge and biological processes, (C) Discharge and organic carbon cycle, and (D) Discharge and sediment records

This book, volume 28 in the *Developments in Food Science Series*, reviews the latest information and up-to-date concepts concerning a great number of aspects of flavor quality. Particular attention has been afforded to provide a balance between food and beverage chemistry, biochemistry, microbiology, nutritional, processing, packaging, storage, computer applications, and chemometrics. Twenty six specialists were invited to discuss the present state of knowledge in their particular fields. Together with their co-workers (totalling over sixty well known researchers) the authors were drawn from the international spectrum of academia, government institutes, and industry. Their presentations included original research results, background reviews, and comprehensive bibliographies. This informative and well documented book goes a long way to improving the current knowledge in a complex area and certainly increase understanding of taste and odor, flavors and off-flavors of high quality foods and beverages.

Online version: Technical papers portion of the SAE Digital Library references thousands of SAE Technical Papers covering the latest advances and research in all areas of mobility engineering including ground vehicle, aerospace, off-highway, and manufacturing technology. Sample coverage includes fuels and lubricants, emissions, electronics, brakes, restraint systems, noise, engines, materials, lighting, and more. Your SAE service includes detailed summaries, complete documents in PDF, plus document storage and maintenance

The author of *Pie Contest in a Box* gets chili fans fired up with "a playful kit with judge and prize ribbons, scorecards and an instruction manual" (Statesman). Chili cook-offs, a fall tradition, have exploded in popularity over the last several years. Easy to organize and yummy to participate in, chili cook-offs are a perfect entertaining event. The booklet in *Chili Cook-Off in a Box* explains why chili cook-offs matter today, and describes the history of chili from pre-Columbian campfires to today's vegan versions. It gives instructions on how to organize the event around themes, such as five-alarm, vegetarian, carnivore's delight, red chili, green chili, etc., and has profiles of chili cook-off winners with prize-winning recipes and tips. Included in the ebook is a link to download and print the following items, which makes it easy to customize your own materials. Sheet to Track Entries (name, type of chili, designated number) Numbered Table Tents (so judges don't know whose chili is whose) Scorecards (rating taste, texture, appearance, creativity) Judge Badges Prize Ribbons for Contest Winners "It would make a fun gift book kit for a chilihead, and certainly is a must-have for anyone hosting a chili throwdown." —Shockingly

Delicious Seit einigen Jahren werden in Deutschland Lebensversicherungsbestände für das Neugeschäft geschlossen und abgewickelt, teilweise innerhalb der bisherigen (Konzern)Strukturen und teilweise nach einem Verkauf an spezialisierte Run-off-Plattformen. Beginnend mit einer Analyse der Herausforderungen der deutschen Lebensversicherung (LV) spricht das Buch die ökonomischen, aktuariellen, (aufsichts-)rechtlichen und gesellschaftspolitischen Fragestellungen der Run-off-Plattformen an und liefert entsprechend prägnante Antworten in mehr als einem Dutzend Beiträgen von verschiedenen Autoren, die mit den Entwicklungen seit vielen Jahren beruflich befasst sind. Das Buch richtet sich an alle, die ein Interesse an der aktuellen Situation der LV und des Run-off-Geschehens haben. Insbesondere an Vorstände und Führungskräfte in Versicherungsunternehmen und Investmentgesellschaften sowie an Wirtschaftswissenschaftler, Aktuarre, Juristen, mit der Versicherungsaufsicht und mit dem Verbraucherschutz befasste Personen sowie an den Versicherungsvertrieb ist dieses Werk adressiert. The reports include annual digests or synopses of the Board of trade reports on boiler explosions, collapses, etc. (The report for 1922 gives a table of explosions for 1911-15 and abstracts of the reports on explosions for 1916-22) In den Portfolios deutscher Lebensversicherungsunternehmen finden sich traditionell erhebliche Anteile von Lebensversicherungsprodukten mit Garantieverzinsung. Ausgelöst durch die anhaltende Niedrigzinsphase auf den Kapitalmärkten wird das Management deutscher Lebensversicherer jedoch dazu gezwungen, ihr klassisches Geschäftsmodell kritisch zu hinterfragen und über ihre künftige Positionierung zu entscheiden. Das Werk gibt einen Einblick in die strategische Entscheidung des Run-offs - dem Verzicht, Neuverträge zu zeichnen. Ausgehend von einer Definition von Run-off nebst zugehöriger Charakteristika werden die potenziellen Treiber für eine Run-off-Entscheidung herausgestellt und ein Überblick über das Volumen geschlossener Bestände im deutschen Lebensversicherungsmarkt gegeben. Weiterhin erfolgt eine Ausarbeitung von Fragestellungen, die im Zusammenhang eines Run-offs aufkommen. Handlungsoptionen im Rahmen eines aktiven Run-off-Managements werden ausgearbeitet und kritisch gewürdigt. Abschließend wird ein Geschäftsmodell vorgestellt, das sich auf das Management von geschlossenen Lebensversicherungsbeständen spezialisiert. Mit dem Run-off deutscher Lebensversicherer widmet sich der Autor einer Thematik, die in der versicherungswissenschaftlichen Literatur bislang nur in sehr begrenztem Umfang aufbereitet wurde. Der Autor bietet einen Einblick in die komplexe Thematik und liefert eine Grundlage für die weitere Diskussion, die Theoretiker als auch Praktiker auf Fach- und Führungskraftenebene der Sparte Lebensversicherung im gleichen Maße einschließen dürfte. Just when the Five were wondering what to do for their summer holiday, a circus with all its gay caravans and performing animals came along the road. This gave them the thrilling idea of going off in a caravan themselves. And thrilling they found it, for when at last they caught up with the circus it was plain that some of the characters had more sinister ways of passing their time than clowning in the Big Top. Without Timmy and Pongo the chimpanzee the criminals would never have got their deserts, and even Anne, who had wanted an ordinary holiday, not too exciting, was sorry when their adventure was all over. This is the Five's fifth adventure. Contributed articles presented at a national conference held in 1997.
