This research anthology is the fourth volume in a series sponsored by the Special Interest Group Research on the Education of Asian and Pacific Americans (SIG-REAPA) of the American Educational Research Association and National Association for Asian and Pacific American Education. This series explores and explains the lived experiences of Asian and Americans as they acculturate to American schools, develop literacy, and claim their place in U.S. society, and blends the work of well established Asian American scholars with the voices of emerging researchers and examines in close detail important issues in Asian American education and socialization. Scholars and educational practitioners will find this book to be an invaluable and enlightening resource. Cents and Sustainability is a clear-sighted response to the 1987

call by Dr Gro Brundtland in Our Common Future to achieve a new era of economic growth that is 'forceful and at the same time socially and environmentally sustainable'. The Brundtland Report argued that not only was it achievable, but that it was an urgent imperative in order to achieve a transition to sustainable development while significantly reducing poverty and driving 'clean and green' investment. With some still arguing for significantly slowing economic growth in order to reduce pressures on the environment, this new book, Cents and Sustainability, shows that it is possible to reconcile the need for economic growth and environmental sustainability through a strategy to decouple economic growth from environmental pressures, combined with a renewed commitment to achieve significant environmental restoration and poverty reduction. Beginning with a brief overview of some of the most pressing environmental challenges of our time, the book then explains 'decoupling theory', overviews a number of factors that can undermine and even block efforts to decouple in both developed and developing countries, and then discusses a number of key considerations to assist the development of national 'decoupling strategies'. The book then focuses on presenting evidence to support greater action, not

just on climate change, but also on decoupling economic growth from the loss of biodiversity and the deterioration of natural systems, freshwater extraction, waste production, and air pollution. In the lead up to the 2012 United Nations Earth Summit and beyond, Cents and Sustainability will be a crucial guide to inform and assist nations to develop strategies to significantly reduce environmental pressures, strengthen their economy, create jobs and reduce poverty. 'I commend the team from The Natural Edge Project and their partners for undertaking to develop a response to 'Our Common Future' to mark its 20th anniversary.' Dr Gro Brundtland. Sequel to The Natural Advantage of Nations Published with The Natural Edge Project Provides nine core-subject units for grades 9-12, including annotated lesson plans with correlations to state standards, learning goals, and links to other units and disciplines. DIVA collection of seminal essays that examines the arguments in favor of the redress movement in the United States./div First patented in 1856, baking powder sparked a classic American struggle for business supremacy. For nearly a century, brands battled to win loyal consumers for the new leavening miracle, transforming American commerce and advertising even as they touched off a chemical revolution in the

world's kitchens. Linda Civitello chronicles the titanic struggle that reshaped America's diet and rewrote its recipes. Presidents and robber barons, bare-knuckle litigation and bold-faced bribery, competing formulas and ruthless pricing--Civitello shows how hundreds of companies sought market control, focusing on the big four of Rumford, Calumet, Clabber Girl, and the once-popular brand Royal. She also tells the war's untold stories, from Royal's claims that its competitors sold poison, to the Ku Klux Klan's campaign against Clabber Girl and its German Catholic owners. Exhaustively researched and rich with detail, Baking Powder Wars is the forgotten story of how a dawning industry raised Cain--and cakes, cookies, muffins, pancakes, donuts, and biscuits. When Thomas Jefferson died on the Fourth of July 1826 -- the nation's fiftieth birthday -- he was more than \$100,000 in debt. Forced to sell thousands of acres of his lands and nearly all of his furniture and artwork, in 1831 his heirs bid a final goodbye to Monticello itself. The house their illustrious patriarch had lovingly designed in the Blue Ridge Mountains of Virginia, his beloved "essay in architecture," was sold to the highest bidder. Saving Monticello offers the first complete post-Jefferson history of this American icon and reveals the amazing story of how one

Jewish family saved the house that became a family home to them for 89 years -- longer than it ever was to the Jeffersons. With a dramatic narrative sweep across generations, Marc Leepson vividly recounts the turbulent saga of this fabled estate. Twice the house came to the brink of ruin, and twice it was saved, by two different generations of the Levy family. United by a fierce love of country, they venerated the Founding Fathers for establishing a religiously tolerant and democratic nation where their family had thrived since the founding of the Georgia colony in 1733, largely free of the persecutions and prejudices of the Old World. Monticello's first savior was the mercurial U.S. Navy Commodore Uriah Phillips Levy, a colorful and controversial sailor, celebrated for his successful campaign to ban flogging in the Navy and excoriated for his stubborn willfulness. Prompted in 1833 by the Marquis de Lafayette's inquiry about "the most beautiful house in America," Levy discovered that Jefferson's mansion had fallen into a miserable state of decay. Acquiring the ruined estate and committing his considerable resources to its renewal, he began what became a tumultuous nine-decade relationship between his family and Jefferson's home. After passing from Levy control at the time of the commodore's death, Monticello fell

once more into hard times, cattle being housed on its first floor and grain in its once elegant upper rooms. Again, remarkably, a member of the Levy family came to the rescue. Uriah's nephew, the aptly named Jefferson Monroe Levy, a three-term New York congressman and wealthy real estate and stock speculator, gained possession in 1879. After Jefferson Levy poured hundreds of thousands of dollars into its repair and upkeep, his chief reward was to face a vicious national campaign, with anti-Semitic overtones, to expropriate the house and turn it over to the government. Only after the campaign had failed, with Levy declaring that he would sell Monticello only when the White House itself was offered for sale, did Levy relinquish it to the Thomas Jefferson Foundation in 1923. Rich with memorable, larger-than-life characters, beginning with Thomas Jefferson himself, the story is cast with such figures as James Turner Barclay, a messianic visionary who owned the house from 1831 to 1834; the fiery Uriah Levy, he of the six courts-martial and teenage wife; the colorful Confederate Colonel Benjamin Franklin Ficklin, who controlled Monticello during the Civil War; and the eccentric, high-living, deal-making egoist Jefferson Monroe Levy. Pulling back the veil of history to reveal a story we thought we knew, Saving Monticello establishes this most American of

houses as more truly reflective of the American experience than has ever been fully appreciated. This book examines the discourses on nation-building, civic identity, minorities, and the formation of religious identities in school textbooks worldwide. It offers up-to-date, practical, and scholarly information on qualitative and mixed-method textbook analysis, as well as the broader context of critical comparative textbook and curriculum analyses in and across selected countries. The volume offers unique and empirical research on how internal educational policies and ideological goals of dominant social, political, and economic groups affect textbook production and the curricular aims in different educational systems worldwide. Chapters address the role of school textbooks in developing nationhood, the creation of citizenship through school textbooks, the complexity of gender in normative discourses, and the intersection of religion and culture in school textbooks. Cicero and Modern Law contains the best modern writings on Cicero's major law related works, such as the Republic, On Law, On Oratory, along with a comprehensive bibliography of writings on Cicero's legal works. These works are organized to reveal the influence of Cicero's writings upon the history of legal thought, including St. Thomas, the

Renaissance, Montesquieu and the U.S. Founding Fathers. Finally, the articles include discussions of Cicero's influence upon central themes in modern legal thought, including legal skepticism, republicanism, mixed government, private property, natural law, conservatism and rhetoric. The editor offers an extensive introduction, placing these articles in the context of an overall view of Cicero's contribution to modern legal thinking.

Andersonvilles of the North, by James M. Gillispie, represents the first broad study to argue that the image of Union prison officials as negligent and cruel to Confederate prisoners is severely flawed. This study is not an attempt to "whitewash" Union prison policies or make light of Confederate prisoner mortality. But once the careful reader disregards unreliable postwar polemics, and focuses exclusively on the more reliable wartime records and documents from both Northern and Southern sources, then a much different, less negative, picture of Northern prison life emerges. While life in Northern prisons was difficult and potentially deadly, no evidence exists of a conspiracy to neglect or mistreat Southern captives. Confederate prisoners' suffering and death were due to a number of factors, but it would seem that Yankee apathy and malice were rarely among them. For centuries the Western

view of the Iroquois was clouded by the myth that they were the supermen of the frontier--the Romans of this Western World, as De Witt Clinton called them in 1811. Only in recent years have scholars come to realize the extent to which Europeans had exaggerated the power of the Iroquois. First published in 1987, Beyond the Covenant Chain was one of the first studies to acknowledge fully that the Iroquois never had an empire. It remains the best study of diplomatic and military relations among Native American groups in seventeenth- and eighteenth-century North America. Published in paperback for the first time, it features a new introduction by Richter and Merrell. Contributors include Douglas W. Boyce, Mary A. Druke-Becker, Richard L. Haan, Francis Jennings, Michael N. McConnell, Theda Perdue, and Neal Salisbury. Howard Zinn's A People's History of the United States has sold more than 2.5 million copies. It is pushed by Hollywood celebrities, defended by university professors who know better, and assigned in high school and college classrooms to teach students that American history is nothing more than a litany of oppression, slavery, and exploitation. Zinn's history is popular, but it is also massively wrong. Scholar Mary Grabar exposes just how wrong in her stunning new book Debunking

Howard Zinn, which demolishes Zinn's Marxist talking points that now dominate American education. In Debunking Howard Zinn, you'll learn, contra Zinn: How Columbus was not a genocidal maniac, and was, in fact, a defender of Indians Why the American Indians were not feminist-communist sexual revolutionaries ahead of their time How the United States was founded to protect liberty, not white males' ill-gotten wealth Why Americans of the "Greatest Generation" were not the equivalent of Nazi war criminals How the Viet Cong were not well-meaning community leaders advocating for local self-rule Why the Black Panthers were not civil rights leaders Grabar also reveals Zinn's bag of dishonest rhetorical tricks: his slavish reliance on partisan history, explicit rejection of historical balance, and selective quotation of sources to make them say the exact opposite of what their authors intended. If you care about America's past—and our future—you need this book. Over the past fifteen years Northeast Asia has witnessed growing intraregional exchanges and interactions, especially in the realms of culture and economy. Still, the region cannot escape from the burden of history. This book examines the formation of historical memory in four Northeast Asian societies (China, Japan, South Korea, and Taiwan) and the United

States focusing on the period from the beginning of the Sino-Japanese war in 1931 until the formal conclusion of the Pacific War with the San Francisco Peace Treaty of 1951. The contributors analyse the recent efforts of Korean, Japanese, and Chinese scholars to write a 'common history' of Northeast Asia and question the underlying motivations for their efforts and subsequent achievements. In doing so, they contend that the greatest obstacle to reconciliation in Northeast Asia lies in the existence of divided, and often conflicting, historical memories. The book argues that a more fruitful approach lies in understanding how historical memory has evolved in each country and been incorporated into respective master narratives. Through uncovering the existence of different master narratives, it is hoped, citizens will develop a more self-critical, self-reflective approach to their own history and that such an introspective effort has the potential to lay the foundation for greater self- and mutual understanding and eventual historical reconciliation in the region. This book will be essential reading for students and scholars of Asian history, Asian education and international relations in East Asia. Tears in the Darkness is an altogether new look at World War II that exposes the myths of war and shows the extent of suffering and loss on

both sides. For the first four months of 1942, U.S., Filipino, and Japanese soldiers fought what was America's first major land battle of World War II, the battle for the tiny Philippine peninsula of Bataan. It ended with the surrender of 76,000 Filipinos and Americans, the single largest defeat in American military history. The defeat, though, was only the beginning, as Michael and Elizabeth M. Norman make dramatically clear in this powerfully original book. From then until the Japanese surrendered in August 1945, the prisoners of war suffered an ordeal of unparalleled cruelty and savagery: forty-one months of captivity, starvation rations, dehydration, hard labor, deadly disease, and torture—far from the machinations of General Douglas MacArthur. The Normans bring to the story remarkable feats of reportage and literary empathy. Their protagonist, Ben Steele, is a figure out of Hemingway: a young cowboy turned sketch artist from Montana who joined the army to see the world. Juxtaposed against Steele's story and the sobering tale of the Death March and its aftermath is the story of a number of Japanese soldiers. Everything you've been taught about the World War II "internment camps" in America is wrong: They were not created primarily because of racism or wartime hysteria. They did not target only those of Japanese descent. They were not

Nazi-style death camps In her latest investigative tour-de-force, New York Times best-selling author Michelle Malkin sets the historical record straight- and debunks radical ethnic alarmists who distort history to undermine common-sense, national security profiling. The need for this myth-shattering book is vital. President Bush's opponents have attacked every homeland defense policy as tantamount to the "racist" and "unjustified" World War II internment. Bush's own transportation secretary, Norm Mineta, continues to milk his childhood experience at a relocation camp as an excuse to ban profiling at airports. Misguided guilt about the past continues to hamper our ability to prevent future terrorist attacks. In Defense of Internment shows that the detention of enemy aliens, and the mass evacuation and relocation of ethnic Japanese from the West Coast were not the result of irrational hatred or conspiratorial bigotry. This document-packed book highlights the vast amount of intelligence, including top-secret "MAGIC" messages, which revealed the Japanese espionage threat on the West Coast. Malkin also tells the truth about: who resided in enemy alien internment camps (nearly half were of European ancestry) what the West Coast relocation centers were really like (tens of thousands of ethnic

Japanese were allowed to leave; hundreds voluntarily chose to move in) why the \$1.65 billion federal reparations law for Japanese internees and evacuees was a bipartisan disaster how both Japanese American and Arab/Muslim American leaders have united to undermine America's safety With trademark fearlessness, Malkin adds desperately needed perspective to the ongoing debate about the balance between civil liberties and national security. In Defense of Internment will outrage, enlighten, and radically change the way you view the past-and the present. After twenty years of research, Dr. J. Barton Payne has compiled the one complete guide to Biblical prophecy. From the prediction of Adam's death in Genesis 2: 17 to the prophecy of mankind's perpetual worship of God in the new heaven and earth (Psalm 72:5), the ENCYCLOPEDIA OF BIBLICAL PROPHECY discusses every verse of prophetic matter in Scripture. It identifies every probable point of fulfillment whether in the past, present, or still in the future. The first 144 pages of the ENCYCLOPEDIA OF BIBLICAL PROPHECY set forth a systematic approach to the subject of Biblical prophecy and the legitimate place for prediction in it. The ENCYCLOPEDIA is arranged according to the 66 books of the Bible. In each book, all the verses on

one prophetic theme are treated in one combined discussion. For example: The 12 verses of Genesis that foretell God's granting of the land of Canaan to the descendants of Abraham are discussed together. It is then shown how the promise was fulfilled in the days of Joshua. One of the

ENCYCLOPEDIA'S concluding summaries lists all the 737 major subjects that appear in Biblical prediction, with the books and paragraphs in which each is found. This way, each prophecy can be traced from its first appearance in the Bible to its last. Among the many features is a complete list of all the Scriptural prophecies pertaining to Christ. No other book has ever examined Biblical prophecy so thoroughly or presented it in such a balanced perspective as the

ENCYCLOPEDIA OF BIBLICAL PROPHECY. •1,817 entries covering all the Biblical predictions in both the Old and New Testaments •A complete discussion of all 8,352 predictive verses in the Bible •14 tables, including three on the Book of Revelation •Bibliography •4 summaries •4 statistical appendixes •5 complete indexes

An indispensable tool for students of the Bible, for students in theological seminaries and Bible colleges, for pastors as a reference guide, and for concerned lay people. The

ENCYCLOPEDIA OF BIBLICAL PROPHECY is certain to bring a fresh understanding

and rewarding insights of the bible. Focusing on South Africa's three main cities - Johannesburg, Cape Town, and Durban - this book explores South African urban history from the late nineteenth century onwards. In particular, it examines the metropolitan perceptions and experiences of both black and white South Africans, as well as those of visitors, especially visitors from Britain and North America. Drawing on a rich array of city histories, travel writing, novels, films, newspapers, radio and television programs, and oral histories, Vivian Bickford-Smith focuses on the consequences of the depictions of the South African metropolis and the 'slums' they contained, and especially on how senses of urban belonging and geography helped create and reinforce South African ethnicities and nationalisms. This ambitious and pioneering account, spanning more than a century, will be welcomed by scholars and students of African history, urban history, and historical geography. In this provocative book Warren A. Nord argues that public schools and universities leave the vast majority of students religiously illiterate. Such education is not religiously neutral, a matter of constitutional importance; indeed, it borders on secular indoctrination when measured against the requirements of a good liberal education and the

demands of critical thinking. Nord also argues that religious perspectives must be included in courses that address morality and those Big Questions that a good education cannot ignore. He outlines a variety of civic reasons for studying religion, and argues that the Establishment Clause doesn't just permit, but requires, taking religion seriously. While acknowledging the difficulty of taking religion seriously in schools and universities, Nord makes a cogent case for requiring both high school and undergraduate students to take a year long course in religious studies, and for discussing religion in any course that deals with religiously controversial material. The final chapters address how religion might best be addressed in history, literature, economics, and (perhaps most controversially) science courses. He also discusses Bible courses, and the relevance of religion to moral education and ethics courses. While his position will be taken by some as radical, he argues that he is advocating a "middle way" in our culture wars. Public schools and universities can neither promote religion nor ignore it. Does God Make a Difference? increases our understanding of a long and heated cultural conflict; it also proposes a solution to the problem that is philosophically sound and, in the long run, eminently practical. In this signal work of history,

Bancroft Prize winner and Pulitzer Prize finalist Lizabeth Cohen shows how the pursuit of prosperity after World War II fueled our pervasive consumer mentality and transformed American life. Trumpeted as a means to promote the general welfare, mass consumption quickly outgrew its economic objectives and became synonymous with patriotism, social equality, and the American Dream. Material goods came to embody the promise of America, and the power of consumers to purchase everything from vacuum cleaners to convertibles gave rise to the power of citizens to purchase political influence and effect social change. Yet despite undeniable successes and unprecedented affluence, mass consumption also fostered economic inequality and the fracturing of society along gender, class, and racial lines. In charting the complex legacy of our “Consumers’ Republic” Lizabeth Cohen has written a bold, encompassing, and profoundly influential book. Keeping the Republic, Eleventh Edition gives students the power to examine the narrative of what’s going on in American politics, distinguish fact from fiction and balance from bias, and influence the message through informed citizenship. Christine Barbour and Gerald C. Wright draw students into the study of American politics, showing them how to think critically about “who

gets what, and how" while exploring the twin themes of power and citizenship. With students living through one of the most challenging periods in American life, this text is a much-needed resource to help them make sense of politics in America today and become savvy consumers of political information. Instructor Resource Site. Learn more. For the past three decades, many history professors have allowed their biases to distort the way America's past is taught. These intellectuals have searched for instances of racism, sexism, and bigotry in our history while downplaying the greatness of America's patriots and the achievements of "dead white men." As a result, more emphasis is placed on Harriet Tubman than on George Washington; more about the internment of Japanese Americans during World War II than about D-Day or Iwo Jima; more on the dangers we faced from Joseph McCarthy than those we faced from Josef Stalin. A Patriot's History of the United States corrects those doctrinaire biases. In this groundbreaking book, America's discovery, founding, and development are reexamined with an appreciation for the elements of public virtue, personal liberty, and private property that make this nation uniquely successful. This book offers a long-overdue acknowledgment of America's true and proud history. Latinx hypersexualized lovers or kingpin predators pulsate from our TVs, smartphones, and Hollywood movie screens. Tweets from the executive office brand Latinxs as bad-hombre hordes and marauding rapists and traffickers. A-list Anglo historical figures like Billy the Kid haunt us with their toxic masculinities.

These are the themes creatively explored by the eighteen contributors in Decolonizing Latinx Masculinities. Together they explore how legacies of colonization and capitalist exploitation and oppression have created toxic forms of masculinity that continue to suffocate our existence as Latinxs. And while the authors seek to identify all cultural phenomena that collectively create reductive, destructive, and toxic constructions of masculinity that traffic in misogyny and homophobia, they also uncover the many spaces—such as Xicanx-Indígena languages, resistant food cultures, music performances, and queer Latinx rodeo practices—where Latinx communities can and do exhale healing masculinities. With unity of heart and mind, the creative and the scholarly, Decolonizing Latinx Masculinities opens wide its arms to all non-binary, decolonial masculinities today to grow a stronger, resilient, and more compassionate new generation of Latinxs tomorrow. Soares Nicholas Villanueva Jr. "Missouri was filled with bitter sentiment over the Civil War. Governor Claiborne Jackson had a plan to seize the St. Louis Arsenal and arm a pro-secessionist force. Former governor and Mexican-American War hero Sterling Price commanded the Missouri State Guard charged to protect the state from Federal troops. The disagreements led to ten military actions, causing hundreds of casualties before First Bull Run in the East. The state guard garnered a series of victories before losing control to the Union in 1862. Guerrilla and bushwhacker bands roamed the state at will. Author Joseph W. McCoskrie Jr. details the fight for the Show Me State."--Back cover. Maps on lining papers Includes bibliographies and index Summary: Traces the history of the United States from the arrival of first Indian people to the present day. This popular text advocates an inquiry and activity-based view of social studies teaching that respects the points of view of students and teachers. Based in practice and experience, it offers systematic support and open, honest advice for new teachers, is conversational not pedantic, and provides lots of examples. While the structure and most of the topics remain largely the same as before, this Third Edition presents new lesson ideas in every chapter especially designed to help new teachers to address

learning standards, to work in inclusive settings, and to promote literacy and the use of technology in social studies classrooms puts a heavier focus on what is important to know and why includes new essays on the politics of social studies education responds to opponents of project- or activity-based social studies instruction and multicultural education with a sharpened defense of both of these approaches throughout the book Intended as a text for undergraduate and graduate pre-service social studies methods courses, this text is also useful for in-service training programs, as a reference for new social studies teachers, and as a resource for experienced social studies educators who are engaged in rethinking their teaching practice. A compelling account of a career in education. Dr. Bagnall has served as an elementary school teacher, a public and private high school teacher, a professor in community colleges, and an administrator in a college continuing education division. His many challenges contrast sharply with the problems of today's educators, but his story offers insights and inspiration to those who care about schools and those who teach in them. Teaching and learning through Hollywood, or commercial, film productions is anything but a new approach and has been something of a mainstay in the classroom for nearly

a century. Purposeful and effective instruction through film, however, is not problem-free and there are many challenges that accompany classroom applications of Hollywood motion pictures. In response to the problems and possibilities associated with teaching through film, we have collaboratively developed a collection of practical, classroom-ready lesson ideas that might bridge gaps between theory and practice and assist teachers endeavoring to make effective use of film in their classrooms. We believe that film can serve as a powerful tool in the social studies classroom and, where appropriately utilized, foster critical thinking and civic mindedness. The College, Career, and Civic Life (C3) framework, represents a renewed and formalized emphasis on the perennial social studies goals of deep thinking, reading and writing. We believe that as teachers endeavor to digest and implement the platform in schools and classrooms across the country, the desire for access to structured strategies that lead to more active and rigorous investigation in the social studies classroom will grow increasingly acute. Our hope is that this edited book might play a small role in the larger project of supporting practitioners, specifically K-12 teachers of United States history, by offering a collection of classroom-ready tools

based on the Hollywood or History? strategy and designed to foster historical inquiry through the careful use of historically themed motion pictures. The book consists of K-5 and 6-12 lesson plans addressing the following historical eras (Adapted from: UCLA, National Center for History in Schools). Principally an abridgement of the transcript of the trial as published in: The Sacco-Vanzetti case. 2nd ed. Mamaroneck, N.Y. : P. P. Appel, 1969; followed by a collection of remarks over the past 80 years about the trial and its significance.
