Paediatric CXR training guideline

This is a series of short audiovisual presentations by a paediatric radiologist on how to read a paediatric CXR. The specific focus is on detecting TB

Before you start:
Print out a paper copy of the “Answer sheet paeds CXR training” as you will use this for a short pre-and post-training quiz

Following this:
... open up the presentations in the folder in the numbered order.
  1. Introduction to the course
  2. The quiz, round one, using the answer sheet
  3. Introduction to paediatric CXRs
  4. The AP paediatric CXR
  5. The lateral paediatric CXR
  6. The quiz, round two, using the same answer sheet. You will need to open the PWP as a slide show to activate the timer for the quiz
  7. Mark your pre- and post-test quizzes and then follow with the expert explanation of the CXRs

“Paeds CXRs for laminating” doc
In order to maximise the application of your learning when back in your consulting rooms, it is suggested that this doc is printed out (ideally laminated for durability) and stuck up on the wall next to the xray box as a memory jogger while looking at CXRs.
